ROSES *and* FRUIT TREES

from

Anderson & Co. Pty. Ltd.

399 GEORGE STREET, SYDNEY. BW 1621	90 PARRAMATTA ROAD, SUMMER HILL. U 2851	109 PITT STREET, SYDNEY. B 6956
BOX 1608BB G.P.O., SYDNEY		

The Price You Pay For Rose Trees

Count the cost!

Count it carefully, too!!

Because sometimes you are offered rose trees at a few pence per plant cheaper; and you may expect to save money—more especially if you need a number of plants.

But can you afford to take the risk of disappointment and loss of valuable time incurred by purchasing these so-called cheaper plants?

Surely, when we remember the years of service PROPERLY-GROWN rose trees give, for the trifle they cost altogether, it is false economy to take the risk of inferior plants for the sake of a few pence!

WHY ANDERSON'S ROSES ARE BEST

Our roses are budded on the very best briar stocks, which not only assure strong, sturdy growth, but also are free from the tiresome habit of suckering, which makes some rose trees dear at any price.

Anderson's roses are skilfully worked, to form shapely plants right from the outset. They have thick main stems, with abundance of fibrous roots, that assure speedy and safe re-establishment in the gardens of the people, and robust growth, and free flowering afterwards.

Our rose trees are DISEASE FREE—there's no fear of introducing trouble into your garden with the healthy plants we supply.

TRUE TO NAME

We know it's the least any firm should do to make sure you get the variety you ask for, and we take the necessary precautions to see you get it. Our system precludes mistakes—but can the same be said of those who attempt to grow for cheapness?

PLANTING AND CULTIVATION

Roses like a rather heavy loam with a well-drained red clay subsoil, but don't worry if your land will not conform to that description. Roses can be grown even on sandy soils if plenty of old decomposed cow manure or some heavy soil be at hand to place in the subsoil underneath where each plant is to grow.

We advise trenching the site 20 inches deep and incorporating all manure with the under-layers of soil; but Roses will give a good account of themselves under almost any conditions, always remembering that the better the treatment the better the result.

We consider from May to the end of July is the best time to plant; but Roses will shift safely till September, with care.

When planting, see that the roots are spread in an outward and downward position. This is best arranged by leaving the bottom of each hole the shape of a saucer turned upside down. A clod of soil will hold unruly roots in position while you fill in the hole, after the tree is in position.

DON'T allow new manure to come in contact with the roots. Coarse sand is good to place in the bottom of the hole, and also round the roots themselves.

Plant firmly, and give each plant a pail of water before the hole is quite filled. The last of the soil can be replaced around the plant after the water has soaked in.

DON'T tread this last layer of soil—it is better loose.

REGARDING DEPTH

Budded Roses may be planted so that the union is just under the soil. If the soil is light, they may be planted in an upright position; but on heavy soil it is better to set it so that the briar stock assumes a slanting position, in order that the root system will not be too deep at the outset. This point is, however, made more of by most writers than really matters. It is more important to spread the roots out evenly, in a position that is natural.

STAKING

Every Rose should be tied to a support when planted. This is imperative.

DISTANCE APART

Exhibitors usually prune their plants very hard, and they desire to make most use of the liquid manure they use; so they usually plant the ordinary kinds about two feet apart, giving kinds like Frau Karl Druschki about two or three times that space. For garden effects it is better to plant four feet apart, and use intervening space for bedding plants, such as Pansies, Phlox, etc.

STANDARD ROSES need six feet of space in which to display their charms.

BEDDING ROSES, such as Orleans, etc., are best planted at intervals of 20 inches apart. They may then be depended upon to create that wealth of bloom so greatly admired in this type.

1938 Novelty Roses

All are Bush Roses except where it is definitely stated that they are Climbers.

Price: 4/- each. Any 6 for 21/-. Postage extra. See Page 24.

ANNA NEAGLE (H.T.) (S. McGredy & Sons)

—Colour, bright currant red, of exceptional brilliance; base of petals sunflower yellow. Blooms medium size, full; carried on long stiff stems. Growth vigorous and free branching. foliage dark green and mildew proof.

ARMENIE (H.T.) (E. Buatois)—Bud garnet

purple, opening to large, full, sweetly-scented flower, with blood red petals shaded rich crimson. Growth vigorous, and free flowering.

BRASIER (Ch. Mallerin) Bud long and soli-

tary; colour red with dark flames, opening to a glowing red as in a brazier, thus giving rise to its name. Exceptionally vigorous and profuse flowering with dark green, disease-resistant foliage.

CHAPLIN'S TRIUMPH (H.T.) (Chaplin

Bros.)—Buds perfectly formed, long and shapely, opening to blooms which are fairly full and a rich deep crimson colour. Sweetly scented. Growth strong and vigorous, with good dark green foliage.

CLIMBING BETTY UPRICHARD (Max

Krause)—A vigorous climbing sport of the popular salmon pink dwarf of the same name. A valuable addition to this section.

DICKSON'S PERFECTION (H.T.) (A. Dick-

son & Son)—Colour shrimp pink, heavily overlaid with glowing madder orange, merging into an orange yellow base; blooms large, moderately full, sweet scented, and the growth is very strong and floriferous.

ELITE (H.T.) (M. Tantau)—An advance

on President Hoover. Colour glowing rose with orange shading. Flowers (carried singly) are full, well formed, and sweetly scented. Splendid for garden or cutting.

GIRONA (P. Dot.)—A glorious medley of

rose pink, yellow and red, somewhat resembling Talisman in colour. Buds are pointed, and open to fairly full sweetly scented blooms. The habit is free, giving a constant succession of blooms. Growth is exceptionally vigorous with shiny, disease-resistant foliage.

GOLDEN DRUSCHKI (H.P.) (P. Lambert).

Flower large, full, and perfectly shaped; colour clear golden yellow, fading to paler yellow when fully open, or in hot weather. True "Druschki" type, and an entirely new break in this class. Excellent for exhibition, garden, or cutting.

JHR. MR. C. SANDBERG (H.T.) (G. Buis-

man)—Colour Indian yellow; blooms of fine shape, moderately large and sweetly scented. Strong upright growth, free and perpetual flowering.

KING GEORGE'S MEMORIAL (H.T.) (J.

Bohm)—Strong, vigorous growth, dark crimson colour, with dark, velvety purple shading; blooms are large, full and sweetly scented.

LA PARISIENNE (Ch. Mallerin)—Bud long,

flaming coral in colour, opening to large, fairly full shapely blooms of a golden coral colour. Growth free and vigorous, with good, healthy foliage.

LLEIDA (P. Dot)—This variety reproduces

the beautiful and popular colours of Condesa de Sagato; exterior yellow, interior red; but the flower is larger and of better quality; sweetly perfumed. Growth vigorous, foliage large and abundant. Fine for cutting.

LOUIS WALTER (Ch. Mallerin)—Bloom,

large and full; colour, golden yellow, shaded with orange. Growth vigorous, semi-erect, with good foliage.

MADAME EDOUARD ESTAUNIE (H.T.) (E.

Buatois). Bud very long, carried on a long, stiff stem. Flower opens well; is large, full, and beautifully shaped. Colour Nankeen yellow, shaded red in centre, with flesh colouring on tips and reverse of petals. Very vigorous and free flowering.

MADGE WHIPP (H.T.) (Bees Ltd.)—A big

red fragrant rose, in which glowing crimson and fiery scarlet enter into the colour make-up. Blooms large, with strong petals of velvety texture, and borne on unusually stout stems. Growth vigorous; foliage disease resistant.

McGREDDY'S SUNSET (H.T.) (S. McGredy

& Sons)—Outside of petals clear buttercup yellow; inside chrome yellow at the base, shading off to bright scarlet, colour intensifies as blooms expand. Blooms medium size, full and shapely; growth strong and vigorous.

ORANGE GLORY (H.T.) (M. Leenders)—

Buds and flowers of medium size; full, fragrant, and a magnificent orange colour. Plant grows well; always full of flowers. A first-class rose for gardens. Received many awards.

PALACKY (H.T.) (J. Böhm)—Splendidly

shaped buds, opening to large, beautifully shaped blooms of an orange yellow colour. Quite up to exhibition standard.

NOVELTY ROSES—(Continued).

R.M.S. QUEEN MARY (H.T.) (Verschuren)—An attractive rose of outstanding merit. Colour salmon orange; flowers carried on stiff upright stems. Foliage good; habit free flowering and vigorous.

REX ANDERSON (H.T.) (S. McGredy & Sons). Best described as pale lemon yellow, shaded gold at base of petals. Enormous blooms, full, perfect form; carried on long, stiff stems. Growth is exceptionally free and vigorous; absolutely disease resistant. Ideal for garden and exhibition.

ROCHEFORT (Ch. Mallerin)—Flowers large, full, and sweetly scented; colour yellow, with coral reflexes. Foliage healthy and disease resistant; growth strong and vigorous.

ROTARY LYON (H.T.) (C. Chambard)—Bud very long and shapely, opening to large, cup shaped, full bloom. Colour, back of petals, yellow, lightly shaded carmine. Inside old gold, shaded carmine. Growth is very strong and vigorous, with straight branches and few thorns; habit free.

SAM MCGREDY (H.T.) (S. McGredy & Sons)—Colour of young bloom honey yellow; as flowers expand colour changes to dark cream; base of petals sunflower yellow. Blooms enormous, with a high pointed centre; and open perfectly in all weathers. Growth strong and branching; flowers are freely produced, on sturdy, upright stems. Foliage mildew proof.

S. & M. PERRIER (Ch. Mallerin)—Bud long and large, carried singly on long stems, opening to beautifully shaped, very large, full flowers. Colour satiny pale rose, with golden reflex. Growth vigorous, with strong, thick wood. Large, healthy dark green foliage.

SILVER JUBILEE (H.T.) (A. Dickson & Sons)—Bloom large, full and shapely; often up to exhibition standard. Colour light golden yellow, with chrome base; outside of petals shaded with light rose. Growth strong, vigorous, and hardy, producing a profusion of blooms.

SWEETNESS (H.T.) (A. Dickson & Sons)—Bud long and pointed, opening to large full flower of perfect spiral form, with deep, beautifully reflexed petals. Colour apricot on a light buttercup yellow ground, shaded with light rosy cerise, the colours paling a little as the bloom ages. The fragrance is truly delightful. Growth strong and vigorous; handsome, glossy green foliage.

THE BISHOP (H.T.) (A. Dickson & Sons)—Bright crimson red, full, moderately large flower, of excellent quality; sweet true old rose fragrance. Growth and habit make it an ideal bedding rose, vigorous, erect, bushy, and very floriferous.

VISCOUNTESS CHARLEMONT (H.T.) (S. McGredy & Sons)—Young buds are salmon rose, shading to satiny rose pink as blooms develop. Base of petals deep buttercup yellow. Blooms large, full, of good formation; strong perfume; growth vigorous and branchy.

Recently Introduced Roses

All are Bush Roses except where it is definitely stated that they are Climbers.

Price: 2/- each, 22/- per doz. Postage extra. See Page 24.

AGNES KRAUSE (Hyb. Poly) (M. Tantau)—Bright, fiery red, with a velvet shade; blooms large and borne in umbels. Upright, healthy growth. Already has many admirers.

DICKSON'S CENTENNIAL (H.T.)—Deep glowing crimson, with rich red and black shadings; the colour changes to bright crimson red, enhanced by the lustrous velvety sheen. Bud long and pointed, growing into a large, handsome bloom of loose form. Growth, strong and bushy. Fragrant flowers freely produced on long, strong stems.

EFFEKT (H.T.) (Max Krause)—Inside, scarlet red; outside, flushed golden yellow. Tremendous grower, compact bushes; always in flower. A fine garden Rose.

FAIENCE (H.T.) (Van Rossem)—Habit as Charles P. Kilham, but stronger; green, leathery foliage; continuous flowering. Colour peach and apricot. Reverse of the petals pure yellow. Well-formed flowers.

FRIEDA KRAUSE (H.T.) (Max Krause)—Orange scarlet red of glowing, fiery tone. Strong, upright growth. Foliage reddish green.

GEORGES CHESNEL (Per.)—Flowers medium size, colour golden rose, base of petals orange yellow. Blooms full, of good form; handsome bronze green foliage.

GOLDEN POLY (H. Polyantha) (M. Leenders)—Buds yellow cadmium with red stripes, open flowers buttercup yellow, fading to a fine, yellowish white with lilac edges. Fragrant, dwarf growing and free flowering.

GUISEPPE MOTTA (H.T.) (E. Heizmann)—Inside of petals flesh to satin pink, exterior red-yellow and very brilliant. Flower large and highly perfumed. Semi-double, and particularly brilliant. A rose of great value for massing. Flowers open in all weathers, and the colour does not alter.

RECENT ROSES—(Continued).

HAMBURG (W. Kordes)—A Climbing Polyantha, producing large trusses of fiery, scarlet red flowers. Strong climbing habit; ever-blooming. Dark green, shiny, healthy foliage.

JACQUES LATOUCHE (H.T.) (C. Mallerin)—Orange pink, with yellow reverse; in the early summer the colour is vermilion on inside and yellow outside, a wonderful colour. Large flower. Vigorous, healthy growth.

LEONTINE CONTENOT (H.T.) (Ketten Brothers)—Sunflower yellow, slightly suffused and bordered with vivid pink, changing to buttercup yellow when fully developed. Large, full flowers. Bud long and pointed; continuous flowering. Growth vigorous.

LISBETH PRIM (H.T.) (J. Felberg-Leclerc)—Flowers brilliant copper-cerise red; outer petals overlaid blood-red and marked with darker blotches. Blooms large, full, and richly fragrant, carried on long, stiff stems. Growth vigorous and erect. Splendid for bedding and cut flowers.

LOVE (Climb, H.T.) (Mallerin)—Brilliant, scarlet red; constant colour. Flowers borne 3 to 5 together almost continuously. Very fragrant. A splendid decorative climber with healthy foliage. Recommended for fragrance and brilliant colouring.

LUCY NICOLAS (H.T.) (C. Mallerin)—Coppery coral pink, with gold shaded reflex, colour does not alter with age. Large, full flower; strong growth and most floriferous. Dark green foliage, free from disease. Lasts exceptionally well when cut.

MADAME ROBERT FORTIN (H.T.) (E. Buatois)—Carmine, large, full, and cup-shaped, fragrant flower, opening well in all weathers. Strong, erect growth, very floriferous.

MATADOR (H.T.) (Van Rossem)—Can be called a perfect Etoile de Hollande. Colour scarlet-crimson, with a dark, silky sheen on reverse of petals. Vigorous, healthy grower.

MCGREDY'S PINK (H.T.)—Blooms large; perfect form; sweetly scented. Colour bright rose, fading a little with age. Growth vigorous, free, and branching.

MEME BUY (H.T.) (C. Chambard)—Very strong bush, erect branching habit; bronze green foliage, which is disease resisting. Beautiful coral red bud on rigid stem. Large flower, cup shaped and double, copper coral-red, lightly lighted with golden-yellow.

MOTHER'S DAY (H.T.)—Fine bold bud opening to large full and shapely bloom. Colour, eau-de-nil white, at times showing a flush of pink. Growth vigorous, erect, and branching, producing blooms up to exhibition standard.

MRS. EDWARD LAXTON (H.T.) (Laxton Bros.)—A unique colour combination, old rose and flaming orange. The bloom is well built up with plenty of petals. The habit of growth is similar to Shot Silk; robust, free from disease, and very free flowering. It has all the good points of a Garden Rose, colour, size, and vigour.

OLYMPIA (H.T.) (M. Tantau)—Bright red. Nobly shaped bud carried on a strong, long stalk. Large, full flower; blooms freely. Fragrant. Upright growth, healthy foliage—a good cutting rose.

PROFESSOR DEAUX (Per.)—Bud long and pointed, opening to well-formed full and sweetly-scented blooms. Colour, golden yellow striped clear yellow. Growth vigorous and free.

QUEEN ASTRID (H.T.) (M. Leenders)—Buds, Persian yellow, open flowers, reddish apricot and bronze. A beautiful combination of colours. Flowers large, full, and fragrant; carried on long, strong stems. Strong growth and free flowering.

SHINING SUN (H.T.) (Van Rossem)—A valuable addition to yellow bedding Roses. Most floriferous and continuous in bloom. Bud well formed and pointed. Half open flowers, clear yolk yellow, with soft peach on the outer petals. Flower opens golden-yellow, shading off to dark old-gold as the bloom expands. Growth vigorous, dark, glossy, bronze foliage. Excellent for cutting.

SOLEIL D'ORIENT (H.T.) (J. Croiber Fils)—Strong bush, dark green foliage. Buds oblong, beautifully formed. Large, well developed flower. Colour yellow shaded Indian red. Base of the petals beautiful golden-yellow. A profusion of flowers. Perfume very agreeable.

SOUV. DE DENIER VAN DER GON (H.T.) (Verschuren Pechtold)—Orange - yellow, shaded coppery-red, passing to a golden-yellow. Large, full flower of beautiful form and exquisite perfume. Long, pointed bud on long, strong stem. Vigorous growth, erect habit. Very floriferous.

Standard Roses

Quite distinct from the ordinary bush type of Rose, these have shapely heads carried on straight stems from 30 to 36 inches high.

Our Standard Roses are budded on the most approved stocks. All three-quarter Standards are worked on Multiflora stocks, the stems of which are much thinner than most other briars—this is in no way detrimental. Firm staking is essential, and the stems will soon straighten up.

Look around your garden, and we are quite certain that you will find numerous spots where Standard Roses can be successfully grown. Little or no space is required; therefore, other classes of plants which might be growing nearby are not interfered with in any way. In the centre of flower beds, on lawns, or on each side of the garden path or drive, this class of Rose shows to advantage, and without a doubt will improve the appearance of your garden in general.

FULL STANDARD (36-inch Stems)

THREE-QUARTER STANDARDS (30-inch)

4/- each; 6 for 22/-; 12 for 44/-.

Freight extra.

Standard Roses cannot be sent by post owing to their length, therefore must be shipped or railed.

STANDARD POLYANTHA ROSES

Price: 4/- each; 44/- dozen. Freight extra.

We have a limited supply of some of the Polyantha Roses budded on suitable briars; these make very beautiful plants. The following varieties are available:—

"ELLEN POULSEN," "GLORIA MUNDI," "GOLDLACHS," "IDEAL,"
"RUFUS," "ORLEANS."

(For descriptions, refer to Polyantha Section.)

AVAILABLE FROM LATE MAY OR EARLY JUNE

We strongly advise early ordering, even though you do not wish delivery until a later date. Reserve orders are placed aside in the Nursery awaiting forwarding instructions.

All the leading strong-growing varieties are supplied on Standards.

We shall be pleased to send a list on application.

TYPICAL STANDARD POLYANTHA ROSE

Standard Polyantha Roses are a vision of colourful beauty for practically the whole year round.

"THE NATIONAL" ROSE FOOD

To assure good, healthy growth that is well sustained . . . to promote prolific flower production . . . to produce full-bodied, lasting blooms of rich and vivid colouring—you must feed your plants on a properly-balanced ROSE FOOD that is something MORE THAN AN ORDINARY FERTILIZER!

Our "National" Rose Food is also a "rational" food, because it takes care of every need, not only of Roses, but of other choice garden plants.

It contains POTASH to build up the structure of the plants . . . PHOSPHATES to ripen the wood and act beneficially on other soil ingredients, so that the plants can absorb and assimilate them . . . NITROGEN to form leaves and bark, as well as promoting growth generally.

Special ingredients are included which intensify the colour of blooms and enhance their beauty.

"National" Rose Food is the outcome of the practical Rose Growers' experience, assisted by scientific chemistry.

No waste; no smell; no harmful properties! Sold in bags, with simple instructions for use.

PRICES: 1/6, 2/6, 4/6, 8/-, 14/6, 28/-

DWARF OR BUSH ROSES

The Roses comprising this list are all among the very best grown, and are all suitable for Australian conditions. A succession of good flowers may be obtained throughout the growing season by cutting back the flowering branches to within an eye or two of the old wood.

When ordering Roses, some people call ordinary BUSH Roses "STANDARD," to distinguish them from climbing Varieties. This is not correct. Standard Roses are those having straight main stems 3 ft. high, with a shapely branching head on top. These are budded on specially prepared long briar stocks; hence the higher price of 4/- each, or 44/- per dozen. BUSH Roses are the ordinary Dwarf Garden Roses, and are priced at 1/6 each, 16/- per dozen.

The following is an abridged list only of highly recommended varieties. Ask us about any others you may require:

PRICE: 1/6 EACH, 16/- PER DOZEN.

POSTAGE EXTRA. SEE PAGE 24.

ABBREVIATIONS USED IN DESCRIBING CLASS OF ROSE:

- H.P.** (Hybrid Perpetual)—Chiefly Spring blooming, and sometimes in the Autumn should good rains follow a dry Summer. Very hardy, and can stand a fair amount of frost.
T. (Tea-scented)—Fairly hardy, but will not stand as much frost as H.P.
H.T. (Hybrid Tea)—Class between H.P. and T., but so inter-crossed that it is at times hard to classify correctly. Everblooming and hardy.
Per. (Pernetiana)—Mostly in brilliant colours. Strong growers in dry inland and cold climates, but inclined to die back in the warm, humid districts.

Alexander Hill Grey (T.)—Lemon yellow; vigorous and good.

Albert Maumeme (J. Sauvageot)—Vigorous growth, brilliant colouring. Straight branching habit. Glossy green foliage. Oval bud, carrot-red shaded copper on inside of petals; exterior red, shaded orange yellow. Flower, large, sweetly scented, full. Long, firm stem.

Amalia Jung (H.T.)—Vigorous growth; flower large, full and highly perfumed. Colour, brilliant crimson red. Magnificent.

Ambassador (H.T.)—A promising sport of Talisman, with all the excellent characteristics of the parent. Colour salmon pink with a decided orange flush at base of petals.

America (H.T.)—Buds long and pointed; fragrant rose pink flowers.

Angele Mateu (H.T.) (P. Dot)—Deep old rose, flushed with orange; large, full, attractive, loosely-built flower. Good growth, very floriferous, with rich, fruity fragrance.

Angele Pernet (Per.)—Vivid orange yellow shaded fiery red, and deep reddish apricot; outside of petals golden yellow.

Antoine Rivoire (H.T.)—Large camellia-shaped blooms of a rosy flesh colour freely produced. Good for garden and exhibition. Strong grower.

Autumn (Per.)—Moderately-sized full flower on stiff, upright stem. Combination of orange streaked with crimson and scarlet. Fairly vigorous growth.

Barcelona (H.T.)—Buds long and pointed; large, full blooms of perfect form. Dark carmine crimson, black velvety shadings. Highly perfumed. Growth strong and vigorous.

Hybrid-Tea roses are hardy and free flowering.

Betty Prior (Hyb. Poly.) (D. Prior & Son)—Glorious dark carmine. Large blooms produced in clusters on strong, upright stems. Fragrant, perpetual flowering. Vigorous growth. Disease-resisting foliage. Excellent for bedding and hedges.

Better Times (H.T.)—Sport from Columbia. Large, full, sweetly-scented blooms; brilliant cerise colour. Foliage, dark green and healthy. Growth vigorous.

Betty Uprichard (H.T.)—Salmon to carmine, while the reverse is glowing carmine, with coppery sheen.

DWARF or BUSH ROSES—(Continued)

Briarcliff (H.T.)—Blossoms of bright, even pink. Bud long. Vigorous grower with mildew-proof foliage. Sweetly scented.

Busy Body (H.T.)—Bud shapely and opens to medium size flower of rich, orange yellow colour. Growth, bushy and compact; foliage, bright and healthy. Free flowering.

Caledonia (H.T.)—A splendidly formed pure white, backed up by good growth and foliage.

Canary (H.T.)—The buds are clear golden yellow, opening to canary yellow and paling to white in the last stages. Free blooming.

Caress (H.T.) (Dickson)—Light salmon carmine border, merges into pale buttercup yellow. Very distinctive. Long bud, moderately full flower. Fragrant. Strong, upright growth. Prolific, lengthy flowering period.

Catherine Kordes (H.T.)—The buds are long and pointed, opening to large blooms of ideal shape. The colour is scarlet, with dark shades of crimson. Growth strong and vigorous.

Charles P. Kilham (H.T.)—Brilliant orange orient red, suffused with glowing scarlet. Well shaped buds.

Christopher Stone (H.T.)—Blossoms large, fairly full and good substance. Bright, velvety scarlet, holding the colour well. Growth fairly strong and vigorous; good foliage.

Clarice Goodacre (H.T.)—Beautiful long buds, carried on stiff stems, opening to fairly full blooms. Colour, clean white with a yellow flush. Good for garden and exhibition. Vigorous grower.

Columbia (H.T.)—Rich rose pink flowers on long stems. The growth is vigorous and disease resistant. Highly recommended.

Comtesse de Cayla (T.)—Medium size, semi-double blooms of a beautiful shade of nasturtium red, tinted carmine and copper. Very free flowering and a strong grower.

Comtesse Vandal (H.T.)—Colour of bud, reddish copper with reddish golden bronze, which lightens as bud develops. Inner side of petals is salmon, graduating to gold at the base; the reverse is deep coral.

Condesa de Sastago (Per.)—Erect, vigorous growth. Golden yellow bud opening into a well-formed bloom. Coppery red inside, golden yellow outside. Fragrant.

Countess of Gosford (H.T.)—Salmon pink; base of petals yellow; perfect.

Crimson Glory (H.T.)—Buds, large, opening to full, well formed, sweetly scented blooms. Colour, deep crimson, shaded blood-red, with a beautiful sheen; growth, vigorous; free blooming; spreading habit. Good exhibition and garden rose.

Cuba (Per.)—A very uncommon shade of orange scarlet; inside of the petal rich velvety crimson with carmine towards the tips.

Daily Mail Scented (H.T.)—Colour rich deep velvety red, with a scarlet sheen; excellent shape. An ideal bedding rose.

Dame Edith Helen (H.T.)—The colour is pure glowing pink. Possesses the true old rose scent.

Director Rubio (H.T.)—Blossoms large, fairly full, and freely produced. Colour velvety magenta red; highly perfumed.

Dainty Bess Charming, single, pale pink blossoms—in cooler weather deepening to salmon—with a very prominent centre of crimson and gold stamens. Recommend this variety to all rose-lovers.

Dr. Hawkesworth (H.T.)—Rich crimson, shading to deep maroon. Medium size; blooms of good shape; long stems. Very free flowering and branching habit. Vigorous grower, and sweetly scented.

Duchess of Sutherland (H.T.)—Delicate warm rose pink; large, sweetly-scented flowers. Valuable for garden or exhibition. Strong grower.

Duchess of Wellington (H.T.)—Saffron yellow, stained crimson.

Earl Haig (H.T.)—Large, globular; somewhat flat blooms, reddish crimson in colour. Scented; strong grower.

Edith Nellie Perkins (H.T.)—Outside of petals light Orient red, heavily shaded cerise at top and orange at base; inner face salmon-pink, merging into orange-salmon. Blooms moderately full, well shaped, scented. Growth vigorous.

Editor Macfarland (H.T.)—Flower large and well formed. Colour bright rose, shaded salmon and capucine red. Vigorous, erect grower; blooms of exhibition standard.

Elegante (H.T.)—Creamy yellow bloom of good form, scented. Free flowering; vigorous growth; of spreading habit. Recommended.

Elli Knab (H.T.) (W. Kordes)—Bud, ovoid and pointed. Very large blooms, with wide petals. Colour, bright pink. Extremely strong, upright plant. Long stems, disease resisting.

E. G. Hill (H.T.)—Dazzling scarlet shading to deeper pure red as it develops. The bud is unsurpassed in beauty, except by the open flower, which is a wonder.

Elizabeth Arden (H.T.)—The flower is pure white, of delightful shape and up to exhibition form. The growth vigorous and free blooming; blooms sweetly scented.

Elizabeth of York (H.T.)—Colour a rich shade of cerise pink lit up through the petals with a wonderful iridescence. A most distinct rose. The flower resembles a richly coloured Sunny South.

Ethel Somerset (H.T.)—Shrimp pink.

Etoile de Hollande (H.T.)—Dark red buds, opening to non-fading blooms of a rich bright red colour. Growth strong and erect; free branching habit. Blooms are inclined to be loose in the Spring, but later in the season become much fuller; very sweetly scented.

Everest (H.T.)—An enormous rose of good form. Colour, white suffused with cream; a vigorous grower; suitable for exhibition.

DWARF or BUSH ROSES—(Continued)

- Fascination** (H.T.)—Rosy cerise, shaded yellow.
- Federico Casas** (H.T.)—Bud very large, long-pointed bud, red; flower large, semi-double, intensely fragrant, red and yellow.
- Felberg's Rosa Druschki** (H.P.)—The beautiful large blooms are in form and constitution like Frau Karl Druschki. The colour bright pink.
- Feu Pernet Ducher** (H.T.)—Buds long, opening to fully double blooms of unusual size and excellent shape. Colour deep yellow showing at times a light marking of rose on the outer petals. Growth vigorous and branching; exceptionally free flowering bloom often up to exhibition standard.
- Francis Scott Key** (H.T.)—Deep red; excellent.
- Frau Karl Druschki** (H.T.)—Pure white; one of the best.
- Frazer Annesley** (H.T.) (S. McGredy & Sons)—Long blooms, pointed and full, of medium size. Long, stiff stems. Colour, inside cochineal carmine, with golden yellow base; outside, saffron yellow. Habit free and branching.
- Fred Walker** (H.T.) (S. McGredy & Sons)—A new colour. Buds coral red, blooms expand into a lovely glowing pink, with coppery orange base, full flower, old rose and flushed gold. Blooms are large, good shape, tea perfume.
- Gaiety** (H.T.)—Bud large, long-pointed. Colour orange, Indian red and silver.
- General Gallieni** (T.)—Brownish crimson, shaded copper; centre rose flesh. Blooms are produced continuously; growth, vigorous and clean.
- General MacArthur** (H.T.)—Richest crimson, shaded scarlet.
- George Arends** (H.P.)—Large blooms, nice clear pink; sweetly scented and free blooming. Vigorous grower.
- George Dickson** (H.T.)—Scarlet crimson.
- George Schwartz** (T.)—Deep canary yellow.
- Gipsy Lass** (H.T.)—Rich scarlet crimson, with blackish shading; full, globular, lasting; foliage hard, disease resisting. Vigorous growth, free and perpetual; true rose perfume.
- Gisele Alday** (H.T.)—Vigorous, upright growth, free branching, dark green foliage free from disease. Long buds, dark coral pink. Long stalk. Flowers, large, flesh pink, lighted with orange. Profuse flowering habit.
- Golden Dawn** (H.T.)—The buds are rich sun-flower yellow, heavily flushed with deep old rose. The blooms are richly tea-scented.
- Golden Emblem** (Per.)—Reddish golden buds opening to beautiful blooms of a bright cadmium yellow. Moderate growth.
- Golden Ophelia** (H.T.)—A seedling from "Ophelia." Colour, golden yellow in centre.
- Goldense Mainz** (H.T.)—Bud, sunny yellow with red stripes. Open bloom, full, and keeps the bud colour until petals drop; strong tea scent.
- Heinrich Wendland** (Per.)—Deep golden yellow on the reverse and a vivid nasturtium red on the inner face of the petal. The pointed buds open to large fairly full blooms. Growth moderate.
- Hilda** (H.T.)—Flowers large, very full and globular in form, lasting well when cut. The colour is a bright carmine, inner petals light pink. Growth vigorous and upright.
- Hoosier Beauty** (H.T.)—Crimson, with darker shadings. A real beauty.
- Hugo Roller** (T.)—Rich lemon yellow, petals edged crimson.
- Irish Elegance** (H.T.)—Bronzy orange, profuse bloomer; single.
- Irish Fireflame** (H.T.)—Single. A deep madder orange, splashed with crimson. Strong tea perfumed.
- Isobel** (Per.)—Splendid single rose of dainty colouring, carmine flushed with orange-scarlet; moderately strong grower.
- Joanna Hill** (H.T.)—Outer petals clear sulphur yellow; inner petals deeper, showing a decided pink flush, fairly full and well formed. Strong grower.
- John C. M. Mensing** (H.T.)—Sport from Ophelia with habit and growth identical with parent. The colour is salmon-pink with buff centre. Splendid garden and cutting variety.
- Jonkheer J. L. Mock** (H.T.)—Large, perfect formation; highly perfumed; colour carmine.
- Joyous Cavalier** (H.T.)—The bud is a splendid shape opening to large loose bloom of the decorative type; colour light crimson, which does not fade. Growth strong and branching. Extremely floriferous.
- Julien Potin** (Per.)—The most gorgeous and brilliant yellow rose yet introduced. The buds are long and shapely; sweetly scented. Growth upright.
- Kaiserin Augusta Viktoria** (H.T.)—Creamy white; one of the best.
- Karl Scholz** (H.T.) (W. Kordes)—Bud, long and pointed, blooms with high pointed centre. Colour, scarlet crimson.
- K. of K.** (H.T.)—Intense scarlet; semi-single.
- Konigin Luise** (H.T.)—Colour white, with an occasional greenish tinge. An improved "Kaiserin Augusta Viktoria."
- Korovo** (H.T.)—Flowers are large and full; colour peach blossom and old rose. Growth vigorous, flowers freely.
- Lady Ashtown** (H.T.)—Large, full, with high-pointed centre. Deep rose, shading to yellow at base of petals. Vigorous grower. Excellent garden and show rose.
- Lady Helen Maglona** (H.T.)—The bud and young flowers bright crimson red with blackish markings.
- Lady Hillingdon** (T.)—In cool districts orange yellow; in less favourable climates, rich yellow. Buds long and pointed; flowers freely.
- Lady Huntingfield** (H.T.)—Australian raised. Blooms moderately large, golden in colour; habit of growth very strong and floriferous.
- Lady Roberts** (T.)—Reddish apricot; the base of the petals coppery red.

DWARF OR BUSH ROSES—(Continued)

Lady Sylvia (H.T.)—A sport from Ophelia with similar habit of growth to parent. The colour is soft, clear pink.

Laurent Carle (H.T.)—Brilliant velvety carmine; perfumed; good.

Leading Lady (H.T.) (Dickson)—Clear flesh pink, flushed peach-blossom rose, with soft, satiny glow. Large, full flower of ideal form with reflexed petals. Sweet perfume, long stems, disease resisting.

Li Bures (Per.)—Buds, long, on stiff stems, a pretty combination of red, rose and yellow. Free and continuous. Sweetly scented.

Liebesbote (H.T.) (C. Weigand)—Crimson scarlet. Large, full, well formed, sweetly scented blooms. Vigorous, healthy, low-growing habit.

Lord Castlereagh (H.T.)—Beautiful dark buds opening to semi-double blooms of a deep velvety crimson. Growth, strong, free branching; very free flowering. Fragrant.

Lord Charlemont (H.T.)—Clear crimson, deepening to carmine crimson; sweetly scented.

Lord Rossmore (H.T.)—Blooms large and splendid shape. Colour, creamy white, shaded pink. Vigorous grower.

Lorraine Lee—Semi-double blooms of medium size. Buds salmon rose, becoming paler as the bloom opens; a wonderfully free flowering decorative. A moderate grower.

Los Angeles (Per.)—Luminous flame pink, toned coral and gold at base of petals; long-pointed bud.

Louise Crette (H.P.)—Very large and full blooms of perfect form. White, with creamy centre; good show rose. Very vigorous.

Lucie Marie (H.T.)—Bud large and pointed, blooms of good size and form. Colour, buttercup yellow, heavily washed and veined apricot-orange, shaded salmon-cerise. Growth vigorous, with free branching habit; profuse and continuous flowering. Sweetly scented.

Luis Brinas (H.T.) (P. Dot)—Orange copper, pointed buds, opening to full flower, with high centre. Mature flowers soft old rose flushed with gold, vigorous and free flowering.

Mabel Turner (H.T.)—Flowers large and well formed. Deep salmon.

Madame Abel Chatenay (H.T.)—Pale flesh shaded rose; free flowering.

Madame Butterfly (H.T.)—Sport from Ophelia; a harmony of bright pink, apricot and gold; excellent.

Madame Edouard Herriot (Per.)—A deep terra-cotta or reddish copper.

Madame Joseph Perraud (P.) (Pernet Ducher)—Nasturtium orange in the bud, changing to buff as flower expands. Edges of petals shaded pink. Long buds, large, full flowers, sweet perfume; excellent growth and habit.

Madame Jules Bouche (H.T.)—Salmon white, centre shaded virginal pink. Recommended.

Madame Jules Grolez (H.T.)—Well-formed blooms of a brilliant china rose; very free flowering. Moderate grower.

Madame Louis Lens (H.T.)—Perfectly formed, pure white flowers; strong growth and free branching habit; healthy green foliage; profuse and continuous in bloom.

Madame Nicholas Aussel (Per.)—Rich, coppery orange. Flowers of splendid size and shape up to exhibition form; growth good.

Madame Pierre S. Du Pont (H.T.)—Growth vigorous and erect, free branching; foliage clear green; long bud, erect stem; flower large, sweetly scented. Colour intense yellow shaded ochre.

Madame Segond Weber (H.T.)—Petals large and firm; colour rosy salmon.

Maison Pernet Ducher (P.) (Pernet Ducher)—Long buds, full flower, perfect form. Colour clear orange, shaded copper. Disease resisting, excellent for cutting.

Malar Ros (H.T.)—Large pointed and well-shaped bud, opening to full, perfectly formed bloom, often up to exhibition standard. The colour is deep crimson, and the perfume is very strong and sweet. Growth is upright and vigorous.

Maman Cochet (T.)—Blush rose, shaded carmine and salmon.

Margaret McGredy (H.T.)—Colour orange-scarlet. Flowers large, full and of perfect form.

Marie van Houtte (T.)—Large, full blooms; colour, cream, edge rose and peach. Very free and vigorous.

Mary Hart (H.T.)—Well formed flowers of deep velvety red, with an overflow of amber. Opens perfectly. A sport of Talisman possessing vigorous constitution and beautiful foliage. Heavy stems. Very highly recommended.

McGredy's Peach (H.T.)—Creamy yellow washed salmon. Beautiful and delicate combination. Large, full flowers of splendid shape; slight tea perfume. Free, upright, and vigorous growth; stout stems; dark green, glossy, disease-free foliage.

McGredy's Scarlet (H.T.)—Colour brilliant rich scarlet with orange base to petals. Vigorous and upright growth.

McGredy's Triumph (H.T.)—Geranium red flushed orange, gradually deepening to rich orange. Flowers, large, full, of perfect shape, and delicious rose scent. Growth, strong and vigorous.

McGredy's Wonder (H.T.)—Colour, brilliant coppery orange, with faint orange red flush towards edge of petals, outside petals deeper tinge of orange red. Growth, vigorous, upright, and breaks freely; blooms profusely. An ideal bedding rose.

McGredy's Yellow (H.T.)—Large, bright, buttercup yellow flowers; every bloom is of perfect form and sweetly scented. A strong grower. Growth, upright and disease free. Excellent for bedding and exhibition

DWARF or BUSH ROSES—(Continued)

- Memory** (H.T.) — Bud, long, pointed. Flower very large, double, cupped, fragrant; light pink with silvery reflexes, shading to apple blossom pink and yellow at the base; borne singly on long stems.
- Mevr. G. A. Van Rossem** (Per.)—Dark yellow ground, heavily flamed and shaded dark orange and apricot.
- Molly Sharman-Crawford** (T.)—Delicate eau-de-nil, white; perfumed.
- Mrs. A. R. Barraclough** (H.T.)—Bright sparkling carmine-pink, shading to yellow at base. Colour seems to become brighter as the flower ages; flowers are full, of good size, and perfect form. Growth fairly vigorous. Sweetly scented. Good show rose.
- Mrs. A. R. Waddell** (H.T.)—Very long buds of reddish-salmon tints.
- Mrs. Aaron Ward** (H.T.)—Blossoms medium size, but full. Indian yellow with deeper centre; free flowering. Moderate grower.
- Mrs. Bryce Allen** (H.T.)—Carmine rose, highly perfumed.
- Mrs. Charles Lamplough** (H.T.)—Soft lemon, sweetly scented.
- Mrs. C. J. Bell** (H.T.)—A sport from Radiance; colour, delicate shell pink.
- Mrs. Dunlop-Best** (H.T.)—Reddish apricot, base of petals coppery yellow; perfumed.
- Mrs. George Geary** (H.T.)—Blossoms, large, full, and sometimes up to exhibition standard. Colour, rich deep pink, which varies towards bright red according to the season. Growth, strong and vigorous.
- Mrs. George Shawyer** (H.T.)—Rosy pink semi-double blossoms.
- Mrs. Harold Brocklebank** (H.T.)—Creamy white, centre buff, base of petals golden yellow.
- Mrs. H. R. Darlington** (H.T.)—Creamy yellow, sweetly scented.
- Mrs. H. Stevens** (T.)—One of the best whites; buds long and pointed.
- Mrs. H. Winnett** (H.T.)—Beautiful red, not as dark as Hadley.
- Mrs. J. D. Eisele** (H.T.)—Rich cherry rose. Blossoms large and of fine form; up to exhibition standard; growth strong and vigorous.
- Mrs. Mackellar** (H.T.) — Citron yellow, shaded primrose. Blossoms, large, fairly full, and perfectly formed. Petals reflex, giving a fine appearance. Vigorous grower. Good exhibition rose.
- Mrs. William C. Egan** (H.T.)—Large, well-formed blossoms of a light soft pink colour. Flowers freely produced. Growth moderate to vigorous.
- Mrs. W. E. Lenon** (H.T.)—Large, long, pointed buds, opening to moderately full, sweetly scented flowers of a rich carmine-crimson. Vigorous grower and continuous bloomer.
- My Maryland** (H.T.)—Rich salmon pink. Blossoms large, full and nicely shaped; a free blooming and vigorous rose suitable for garden or exhibition.

- Nigrette** (H.T.) — Velvety black without shading—the darkest of all roses. Bud, medium size, pointed; blossoms, full, good form, opening well in all weathers. Sweetly scented.
- Norman Lambert** (H.T.)—Outside of petals rich buttercup yellow, inside of petals salmon orange suffused bronzy yellow. Large, fairly full blossoms of perfect form. Sweetly scented. Very free blooming and a vigorous grower.
- Oliver Mee** (H.T.)—Colour deep salmon, with heavy flush of clear fawn. Sweetly scented.
- Ophelia** (H.T.)—Salmon flesh, shaded with rose.
- Padre** (H.T.)—Coppery scarlet in the buds, opening to coppery salmon and salmon pink. The semi-double blossoms are large and carried on long stems.
- Penelope** (T.)—Lower half reddish crimson; centre creamy white.
- Perle des Jardins** (T.)—Bright canary yellow; fragrant.
- Phoebe** (H.T.)—Colour, cream with deep cream centre. Blossoms are full and of good form, carried on long stems. Growth upright and fairly vigorous.
- Phyllis Gold** (H.T.)—Nicely-shaped buds, producing blossoms of splendid formation, with petals of great depth and substance. Colour, pure, non-fading yellow. Growth, vigorous and upright, branching habit.
- Picture** (H.T.)—Ideal rose for garden and bedding and for cutting. Medium size buds, perfectly formed. Clear rose pink velvety petals reflex, giving the impression of a huge flower. Growth, sturdy and free.
- President Herbert Hoover** (H.T.) — Bud, large, long pointed; semi-double; fragrant; outer petals claret red marked crimson; inner petals deep salmon-flesh; strong stem; disease resistant. Highly recommended.
- President Jac Smits** (H.T.)—Brilliant dark red. Flowers large and semi-double, on long straight stems. Free and continuous flowering. Strong grower.
- President Marcia** (H.T.)—Strong, bushy and free flowering; large, olive green foliage; flowers, large, full and fragrant; colour, rose-neyron red, shaded salmon-flesh on reverse side, and tinted ochre at base.
- President Van Oost** (H.T.) (L. Lens)—Bud, yellow orange, opening to golden yellow. Large flower; long stems; vigorous and free flowering.
- Prince Camille de Rohan** (H.P.)—Large blossoms of good shape. Colour, dark maroon, shaded velvety black. Vigorous grower.
- Queensland Beauty** (H.T.)—A pink sport of Golden Dawn, which is identical in habit and growth with the parent. The colour is a deep pink in the bud stage, but as the bloom advances it lightens somewhat in colouring.
- Radiance** (H.T.)—Flowers large size; clear rose colour, with a brilliant reverse of dark carmine; stems are long and stiff; flowers erect. A constant bloomer. Perfumed.

DWARF OR BUSH ROSES—(Continued)

- Rapture** (H.T.)—A sport of Mdm. Butterfly. Flower of medium size, borne singly on long stems. Colour, deep pink. Like parent in habit of growth but stronger.
- Red Letter Day** (H.T.)—Scarlet crimson buds, semi-single.
- Red Radiance** (H.T.)—A red flowered sport from the popular favourite Radiance. Very free flowering.
- Rev. F. Page Roberts** (H.T.)—Marechal Neil colour, buff markings reverse of petals.
- Richard E. West** (H.T.)—Cadmium yellow, paler on reflex; fragrant.
- Roger Lamelin** (H.P.)—Scarlet red with a clear well-defined margin of white around the edges, quite distinct. Vigorous grower.
- Rosa Indica**—This variety also known under the names of Cramoisi, Superieur, Lady Brisbane and Crimson China. Growth, compact and bushy; continuously in bloom. Ideal variety for hedges and borders. Colour, bright red.
- Rose Berkeley** (H.T.)—Deep rosy salmon-pink suffused orange; yellow base. Blooms large, full and beautifully formed; for exhibition or garden. Growth, vigorous, bushy and branching.
- Roselandia** (H.T.)—A new yellow sport from Golden Ophelia; larger and deeper in colour.
- Rose Marie** (H.T.)—Rose pink, fragrant; highly recommended.
- Rouge Mallerin** (H.T.) (C. Mallerin)—Pointed brilliant red buds, opening to a full flower with high-pointed centre. Very fragrant, old Damask perfume. Splendid growth. Free flowering.
- Ruby Manwaring** (H.T.)—Good form; richly coloured velvety scarlet, opening a rich rosy cerise, showing a delicate striping throughout the petal. Colouring goes right through the petals. A superb bedding and garden variety; fragrant.
- Sensation** (H.T.)—Scarlet crimson with maroon markings; growth vigorous.
- Shot Silk** (H.T.)—Bright cherry-cerise over-shot with salmon orange, flushed rose, and a deep-veined clear buttercup yellow base.
- Sir Henry Seagrave** (H.T.)—Primrose yellow, chrome base; large well-shaped bud; full flower; vigorous and hardy growth; free blooming; sweet scent.
- Souvenir** (H.T.)—Best described as a golden Talisman. Rich golden yellow colour, with the vigour and prolificacy of its parent.
- Souv. de Claudius Pernet** (Per.)—Sun-flower yellow that does not fade.
- Souv. de Georges Pernet** (Per.)—Large, globular blooms, carried on stiff stems. Beautiful Orient red, shaded with yellow. Growth vigorous and branching.
- Souv. de H. A. Verschuren** (H.T.)—Cadmium yellow, passing to orange yellow.
- Souv. de Madame Boulet** (H.T.)—Dark cadmium yellow; large, long bud.
- Souv. de Maria de Zayas** (H.T.)—Blooms, large and of fine form, suitable for garden or exhibition. Colour, deep carmine, which is somewhat hard at times. Vigorous grower.
- Souv. of Stella Grey** (T.)—Deep orange, with splashes or veinations of yellow, apricot, salmon and crimson.
- Souv. de Therese Levet** (T.)—Dark velvety crimson.
- Star of Queensland** (H.T.)—Rich deep velvety crimson, shaded maroon.
- Sunburst** (H.T.)—Cadmium yellow, orange-yellow centre, large cupped form.
- Sunny South** (H.T.)—A lovely pink, flushed carmine on a yellow base.
- Sunstar** (H.T.)—Deep orange and yellow, edged crimson.
- Talisman** (H.T.)—A very fine and attractive rose; quite distinct. Scarlet, pink, copper and gold are all to be found in the glorious shadings; vigorous grower.
- Texas Centennial** (H.T.)—A sport of President H. Hoover, with all the splendid characteristics of the parent. The colour is blood red, toning to cerise red in centre. A very promising variety.
- Texas Gold** (H.T.)—A yellow sport from President H. Hoover, which is identical with the parent in both habit and growth. The colour is deep yellow, with a slight flush of red on the outer petals, very promising.
- Una Wallace** (H.T.)—Cherry rose, without shading.
- Warrawee** (H.T.)—Extra long pointed buds of clear rosy salmon, which open to large fairly full blooms of a clean silvery pink shade. The blooms are carried on long stems, growth strong and vigorous.
- Warrior** (H.T.)—Flowers vivid scarlet crimson, large, double.
- W. E. Chaplin** (H.T.)—Nice bud opening to large, well-shaped bloom; quite up to exhibition standard. The colour is carmine crimson. The growth is strong and vigorous with a free blooming habit.
- White Ensign** (H.T.)—The colour is pure white flushed delicate cream at very base of petals.
- White Maman Cochet** (T.)—Equal to the celebrated Pink Maman Cochet.
- Wilhelm Breder** (H.T.)—Named in the United States "Glowing Sunset," a fitting name. The flower is large and full. Strong, old-rose scent. Growth, vigorous and erect with reddish-green, healthy foliage.
- William Moore** (H.T.) (S. McGredy & Sons)—Blooms are large, full, of perfect shape, with high-pointed centre. Sweetly scented. Growth vigorous, free and upright. Colour, carmine pink, deepening as the blooms age. Splendid habit; disease resistant. Ideal for bedding and exhibition.
- William Orr** (H.T.)—Flowers large, full and of good form. Colour, deep velvety crimson; growth strong and vigorous.
- Yves Druhen** (H.T.)—Dark velvety red; highly perfumed.

Climbing Roses

1/6 each; 16/- doz. Postage or Carriage Extra. See Page 24.

The prefix "Climbing" is only used when there are dwarf roses of the same name, and should never be omitted when ordering if confusion and disappointment are to be avoided.

Black Boy (H.T.)—Bud well shaped and flower most attractive. Colour, deep crimson, shaded with blackish maroon.

Blaze.—Marvellous, hardy, climbing Rose. Blazing colour of Paul's Scarlet Climber with the everblooming habit of Gruss an Teplitz. It is a very vigorous climbing variety, and produces flowers on both old and new growth.

Clb. Chateau De Clos Vouget (H.T.)—Very dark velvety crimson.

Clb. Columbia (H.T.)—Strong-growing; rich pink.

Clb. Comtesse la Barthe (T.)—A strong climbing sport of the well-known favourite. A free blooming pink climber.

Clb. Daily Mail Scented (H.T.)—A very vigorous climber, and a variety which is sure to prove very popular. The rich velvety-red flowers are very sweetly scented.

Clb. Dame Edith Helen (H.T.)—Vigorous climbing sport of the well-known dwarf variety; unsuited to moist tropical climates. Rose pink.

Clb. Etoile de Hollande (H.T.)—Vigorous climbing sport of Etoile de Hollande. A great acquisition to the dark red climbing roses.

Clb. General Macarthur (H.T.)—Vigorous habit; clean and healthy foliage; fragrant, bright red.

Clb. Georges Schwartz (T.)—The blooms are of the brightest yellow; flowers freely.

Clb. Golden Ophelia (H.T.)—A fine climbing sport of the pretty dwarf variety. The flowers are perfect in shape.

Clb. Golden Emblem (Per.)—A splendid climber, producing golden yellow blooms of delightful colouring.

Clb. Hadley (H.T.)—The flowers resemble the parent, in rich crimson colour and sweet fragrance.

Clb. Hoosier Beauty (H.T.)—Vigorous growth; sweetly scented; rich crimson blooms; highly recommended.

Clb. Hugo Roller (T.)—A good climbing sport of the old bicoloured dwarf of the same name. Colour, lemon yellow, edged and suffused crimson.

Clb. J. J. L. Mock (H.T.)—A splendid climber; particularly valuable to exhibitors; nicely-shaped blooms of a bright carmine pink.

Clb. K. A. Viktoria (H.T.)—A rather uncertain climbing sport of the popular white dwarf, as in some situations it is particularly strong and in others only moderate in growth. Very free blooming.

Clb. Lady Hillingdon (H.T.)—Long buds; deep orange yellow.

Clb. Laurent Carle (H.T.)—A very free flowering and vigorous grower, with sweetly-scented blooms of a pretty shade of red.

Clb. Lorraine Lee (T.)—Fairly vigorous climbing sport of the dwarf variety, producing blooms of a salmon rose colour.

Clb. Los Angeles (Per.)—Vigorous climber, flame pink, shaded coral and gold.

Clb. Mdm. Abel Chatenay (H.T.)—A free blooming pink, which should be planted freely. Strong growing.

Clb. Mdm. Butterfly (H.T.)—A vigorous climbing sport from the dwarf, and considered to be improved in colour, petalage, and fragrance. Colour, pale pink, shaded orange-apricot.

Clb. Madam Edouard Herriot (Per.)—Vigorous climber; beautiful coral red.

Clb. Madam Segond Weber (H.T.)—One of the best climbers. A lovely shade of rosy salmon; strong growing and free flowering.

Clb. Maman Cochet (T.)—A strong climbing sport; colour, blush rose, shaded carmine and salmon.

Clb. Mevr. G. A. Van Rossem (Per.)—A strong growing climbing sport of the popular dwarf of the same name, producing blooms of deep salmon-pink, with outer petals claret-red, flushed crimson.

Clb. Mrs. Aaron Ward (H.T.)—Colour, Indian yellow, with deep centre. Vigorous. Nice foliage.

Clb. Mrs. C. J. Bell (H.T.)—An acquisition, as the shell pink blooms provide a break in the climbing class.

Clb. Mrs. Dunlop Best (H.T.)—A vigorous climber, having clean, healthy foliage. Colour, reddish apricot; base of petals coppery yellow.

Clb. Mrs. G. Sawyer (H.T.)—Brilliant pink; vigorous climber.

Clb. Mrs. H. Stevens (H.T.)—Vigorous grower, full snow-white flower.

Clb. Ophelia (H.T.)—Perfect blooms, which are salmon flesh, shaded rose.

Clb. Penelope (T.)—Outer petals crimson; inner petals creamy colour. A good climber.

Clb. Perle des Jardins (T.)—Bright yellow; profuse.

Clb. Radiance (H.T.)—A real climbing sport of "Radiance." Very vigorous grower.

Clb. Red Radiance (H.T.)—Vigorous climber; bright red.

Clb. Rose Marie (H.T.)—Mildew-proof foliage. Highly recommended. A pretty shade of rose pink.

Clb. Shot Silk (H.T.)—A rich salmon orange cerise veined buttercup yellow, at times over-shot with Orient shades. Vigorous growth; immune from mildew.

Clb. Souv. de Claudius Pernet (Per.)—The growth is vigorous; colour, rich sunflower yellow.

Clb. Souv. de Georges Pernet (Per.)—Orient red shaded yellow. A vigorous climbing sport of the dwarf variety.

Clb. Souv. de Madame Boulet (H.T.)—Dark cadmium yellow; large and fairly full flowers. Beautiful bronze green foliage.

CLIMBING ROSES—(Continued)

- Clb. Souv. de Therese Levet** (T.) — A strong-growing, climbing sport of the old dwarf; valuable as a Winter bloomer. Crimson shaded maroon blooms of medium size.
- Clb. Sunburst** (H.T.)—Colour, cadmium yellow, with orange centre.
- Clb. Sunstar** (H.T.)—Deep orange and yellow, edged crimson.
- Clb. Talisman** (H.T.)—A climbing sport of the well-known Dwarf variety, producing flowers identical with Talisman. The colour varies, but scarlet, pink, copper, and gold are all to be found in the glorious shades; vigorous grower.
- Clb. White Maman Cochet** (T.)—This is a true climber of very vigorous habit.
- Cloth of Gold** (Noisette)—Sulphur yellow.
- Countess of Stradbroke** (H.T.)—A vigorous growing, free blooming rose of exceptional merit. The flowers are large and full. Colour, a rich, dark velvety crimson.
- Flying Colours** (H.T.)—Large single flowers of deep bright cerise.
- Fortune's Yellow** (N.)—Large semi-double blooms. Colour, bronzy yellow, shaded rose. Good pillar rose.
- Jessie Clark**—Large single flowers (4in. across), borne in clusters. Colour, a lovely shade of pink.
- Kitty Kininmonth** (H.T.)—Bright carmine rose.

Mermaid (Hyb. Bracteata)—Large single sulphur yellow, with beautiful stamens. Foliage, glossy; the whole plant being very graceful, whether in bloom or not. Suitable for trellises or pillars.

Mdm. Driout (H.T.)—A beautiful striped pink sport of Reine Marie Henriette; same vigorous habits.

Miss Marion Manifold (H.T.)—Rich velvety scarlet; shaded crimson. Vigorous grower. Free flowering.

Noella Nabonnand (T.)—Extra large, semi-double, velvety crimson buds.

Reine Marie Henriette (H.T.)—Large flowers of good form. Colour, rosy cerise. A splendid Autumn flowerer.

Sachsengruss (H.T.)—Delicate flesh, with China rose reflexes; very large.

Sinica Alba—Large, single, pure white blooms. Glossy green foliage.

Sinica Anemone—Large, single blooms. Silvery pink deepening to bright rose. Glossy foliage.

Souv. de Leonie Viennot (H.T.)—Silvery rose shading to carmine, base of petals canary yellow.

Striped Reine Marie Henriette (H.T.)—Has the same excellent qualities as R. M. Henriette. Flowers striped magenta, on paler ground.

Walter C. Clark (H.T.)—Deep maroon crimson, shaded black; perfumed.

Miniature Roses

1/6 each; 16/- doz. Postage Extra.

This list comprises the best of the Baby Roses. They produce exquisitely shaped blooms in small clusters, suitable for buttonhole or similar decoration; but generally are not suitable for bedding.

Cecil Brunner—Salmon pink with coppery centre.

Etoile Luisante—Orange red, opening to coral and carmine, with a golden yellow base.

George Elger—Golden coppery yellow passing to clear yellow when open. Dwarf.

Perle d'Or—Nankeen yellow with orange centre.

Sunshine—Bronzy red and orange.

Tiptop—Yellow overlaid with carmine. Dwarf.

Dwarf Polyantha Roses

ORLEANS TYPE

Price: 1/6 each, 16/- per dozen. Postage or carriage extra.

This section is most suited for bedding and massing, low edges, or as an edging to taller growing varieties. They produce large clusters of bloom, and are almost continuously in flower. They are all compact growers, and should not be mixed with other types.

Alice Amos—Rosy cerise with white eye, resembling a dwarf American pillar. Flowers are single, borne in large trusses. Tall.

Diana—A unique and charming rose, producing single flowers borne in clusters. Colour, coppery orange with splashes of rose and violet on reverse of the petal.

Ellen Poulsen—Brilliant pink, large, full, sweet scented.

Fireglow—A brilliant and dazzling rose of the Orleans type, being a fiery orange red. A splendid addition to this class. Dwarf.

Gloria Mundi—Flowers large, fully double; orange scarlet.

Goldlachs (Golden Salmon)—An intense fiery golden salmon of wonderful beauty. Flowers medium to large in size, produced in large full trusses. Strong, bushy growth. Fine healthy foliage. Highly recommended.

Ideal—Flower beautiful dark crimson, at times scarlet. A sport from "Miss Edith Cavell," and in growth somewhat similar.

Kirsten Poulsen—This variety produces bright scarlet, medium-sized, single flowers borne in clusters, which are carried on stiff stems. A good variety for decorative work, as the flowers are non-fading. Tall.

Lady Reading—This variety may be termed a sister to Ellen Poulsen, as it has the same habit of growth and characteristics, the only difference being the colour, a bright red. Recommended. Tall.

Maman Turbat—China rose, shaded pink. A good variety. Dwarf.

Mevrouw Van Straaten Van Nes (Hyb. Poly.)—Flowers, brilliant cochineal carmine. Large waved petals, flowering in large clusters. Fragrant. Growth, strong. Highly recommended.

DWARF POLYANTHA ROSES—(Continued)

Miss Edith Cavell—A scarlet-crimson sport from Orleans, possessing all the old favourite's characteristics. Dwarf.

Orleans—Brilliant geranium red, suffused rose, with white centre. Bushy habit; very free flowering.

Paul Crampel—A pretty scarlet orange.

Rufus—Intense bright crimson, holding its colour well and bearing flowers in large trusses. Dwarf.

Salmon Spray—Colour, delicate salmon pink with carmine on reverse of petals. Flowers are semi-double, borne in sprays of from five to twenty, lasting for days in water when cut. Tall.

Sparkler—A brilliant sparkling red of the Orleans type of flower and growth. A very fine variety.

Yvonne Rabier—White, semi-double flowers, strongly perfumed. Tall.

Climbing Polyantha, Rambling, Wichuriana and Banksian Roses

1/6 each; 16/- doz. Postage or Carriage Extra. See Page 24.

American Pillar—Large, single, rich pink, white eye and yellow stamens.

Banksia Alba—White.

Banksia Fortunei—Large white.

Clb. Cecil Brunner—A vigorous climbing sport from the favourite dwarf.

Clb. Goldlachs—A vigorous climbing sport of the dwarf variety, producing blooms of a brilliant, intense orange red. A splendid new colour addition to the climbing Polyantha class.

Clb. Orleans—A climbing sport from the well-known dwarf variety.

Crimson Rambler (Pol.)—Medium-size blooms borne in large clusters. Colour, dazzling crimson. Liable to mildew.

Dorothy Perkins—Beautiful shell pink; double flowers in clusters.

Emily Grey—Golden yellow, climbing rose. Without doubt the finest yellow Wichuriana rose yet introduced.

Excelsa—Brilliant scarlet crimson, large trusses of double flowers; mildew-proof foliage; superior to Crimson Rambler.

Golden Rambler—Flowers fully 4 inches in diameter, in clusters of 2 to 14 or more. Rich yellow, with crimson splashes. True rambler. Delicious fragrance.

Heart of Gold (Hyb. Wich.)—Colour, crimson with white centre, with showy golden stamens. The blooms are single, borne in clusters, and up to three inches across.

Hiawatha—Single; bright rich crimson. White eye.

Isle de France (Wich.)—Colour, crimson-red with white centre; blooms are large, semi-double, and produced in large clusters.

Paul's Scarlet Climber—Vivid scarlet shaded with crimson; suitable for pillar and pergolas.

Princess of Orange (Poly.)—Climbing form of "Gloria Mundi." Flowers like rambler roses on one-year-old wood. This is a most valuable addition and one that will be universally in demand.

Romeo—Deep red; double; perfect form.

Sanders White (Wich.)—Large full blooms of a pure white. The best white available.

Tausendschon—Large pink, in clusters.

Vielchenblau—Reddish lilac, changing to amethyst and steel blue; semi-double.

Violetta (Mult.)—Large, semi-double blooms, borne in large trusses. Colour, deep violet.

Moss Roses

1/6 each; 16/- doz. Postage Extra.

These Roses thrive best in the colder districts; about Sydney they bloom in the Spring only.

Crimson Globe

White Bath.

Zenobia—(Pink).

Rose Hedges

When it is realised just how beautiful a hedge of Roses such as Radiance, Red Letter Day, and some other everblooming Roses form, they will become far more popular for this purpose. The foliage is practically evergreen, and the everblooming qualities of some varieties assure not only a picturesque hedge of great beauty, but also a never-ending supply of long-stemmed Roses for the house.

Plants 1/6 each; 16/- doz. Postage extra. See Page 24.

For hedge purposes we recommend the following varieties (see general lists for description)

FOR TALL HEDGES OVER 4 FEET HIGH:

Radiance, Red Radiance, Red Letter Day, Sunny South.

FOR HEDGES 3 TO 4 FEET HIGH:

Ellen Poulsen (Poly.), Etoile de Hollande, Shot Silk, Rosa Indica.

FOR LOW HEDGES UP TO 2 FEET HIGH:

Gloria Mundi, Goldlachs, Ideal, Maman Turbat, Miss Edith Cavell, Orleans, Rufus (see Polyantha section).

The distance apart for planting is as follows:—For vigorous hedge varieties, 2 feet 6 inches apart; for moderate hedge, 2 feet apart; while for Polyanthas, about 21 inches is a suitable interval. Use only one variety for each hedge.

THE ORCHARD :

ITS PLANTING AND ITS CARE

The Land

It is not necessary that the soil chosen for an orchard should be rich, although such land will always produce splendid crops after the trees are a year or two old and are carefully pruned. Any ordinary average soil will grow fruit trees, provided it is well worked. It is not necessary to trench the ground unless the subsoil is very stiff; then we recommend that it should be trenched and a thorough system of drainage should be adopted. This can be done by putting in rubble, pipe or timber drains at a depth of three feet, and twenty to thirty feet apart, so as to carry off all surplus water from the subsoil as quickly as possible. In trenching the ground the greatest care should be taken not to bring the stiff clay subsoil to the top; it should only be broken up in the bottom of the trench. On land of a fairly good depth and open subsoil, digging and ploughing will be all that is required to prepare it.

Planting

To prepare for fruit trees, the land should be measured off, into rows 20 to 30 feet apart, and the trees should stand at the same distance from each other in rows, so that they will be 20 to 30 feet apart each way. This will give the cultivator every facility to work between them. The holes to receive the trees should be dug to a depth of 18 inches, and made wide enough to allow the roots of the young trees to spread out. The soil in the bottom of the hole should be broken up as fine as possible, then a good stout stake should be driven into the centre of it.

Examine the roots of the tree, and remove all bruised or broken rootlets with a sharp knife; then place it in the hole close to the stake and spread out the roots carefully and as horizontally as possible; drop the fine soil on to the roots until the hole is about one-third full; then gently shake the tree from side to side and lift it slightly from time to time with an up-and-down motion; the object of so doing is to allow the soil to shake down among the small roots; then fill up the hole to the level, and tread the soil tightly around the tree; secure it to the stake in two places, near the ground and near the top, and the planting is completed. Trees should be planted not more than a couple of inches deeper than they stood in the nursery.

Manure

It is not desirable to give young trees manure in the earlier stages of their growth, as it is liable to promote an overgrowth of young wood, and if the land is virgin soil, or if it has been out of cultivation for some years, the breaking it up for the fruit trees will be quite sufficient to cause them to grow freely for a year or two at least, but if the ground is naturally poor a good dressing of bone-dust or other manure can be given to the trees at a later date if they show any signs of stunted growth.

Aspect

In selecting a site for an orchard, an easterly to a north-westerly aspect should be chosen if possible. The matter of shelter, if not naturally provided, should be of the first importance, as also natural drainage and convenience of position.

Time to Plant

Deciduous fruit trees, or summer fruits, as they are sometimes incorrectly called, such as Peaches, Plums, Cherries, should be planted during May, June, July, and August, and if the weather is favourable, the earlier the better. Evergreen trees, such as Oranges, Lemons, can be planted at almost any season of the year, but from April to September are the best months. Only plant to July and August in localities fairly free from frosts.

First Pruning of Young Trees

When the deciduous fruits are planted, they should be cut back to the height fixed upon for

the trunk. If there are no natural branches three buds only should be allowed to push out from the head of the tree. This will generally be the case with Apples and Pears, but Peaches and such like will often have several lateral branches. In that case cut the leader to the height required, and cut off all the laterals except three near the top; these should be left to form the head, but should be shortened. Each tree after planting may be sprayed with Harbas in solution, to destroy any insect pests which may possibly be hidden in the bark.

When young fruit trees are properly summer pruned during the first few years after planting it conduces to the early development of fruit-bearing spurs on such trees as Apples, Apricots, Pears, Plums. If the operation is skilfully performed, the vigour of the whole, or any particular part, can be reduced or limited. By systematically pruning in summer, much good will not only result to the branches retained, but there will be less need for cutting severely in winter, and consequently the strength of the trees will be conserved. Summer pruning must not be done before the shoots have reached a certain stage, otherwise the buds at the base of the spurs left will develop growth the same season, instead of remaining dormant, and forming into fruit-bearing buds for the following crop. Generally, the most suitable time is when the growth becomes firm for about half its length, which should be shortened there or a little higher up, according to the vigour of the tree. The summer pruning of such fruit trees as Nectarines and Peaches, which do not usually bear fruit on spurs, will require different treatment. The fruit of these trees is mostly borne on what is called young wood—that is, growth made during the previous year. Therefore, only the useless and superfluous growths should be removed.

Disbudding may be considered a part of summer pruning, for the judicious removal of the developing shoots at such an early stage of growth will not only conserve the strength of the trees, but will save a lot of labour which would have to be expended in cutting them out after they become wood.

Varieties to Plant

If, as a commercial speculation, a large area is being planted, we cannot too strongly emphasise the necessity of confining the plantation to a few well-tested varieties that do well in the vicinity, and have proved profitable.

Frequently we hear orchardists regretting the error they made when first planting, in having too many varieties, and consequently they have never sufficient of any one sort to enable them to place on the market in a satisfactory manner.

Ascertain what is doing well in your locality, and confine yourself to this sort, leaving an odd row or so for experimenting with new importations.

Grape Vines

European Grape Vines should be placed five feet apart each way, in straight lines, that the plough may be used either across or along the vineyard. If the land be rich and deep, the distance between the vines should be increased to 6, 7, or 8 feet. The American Grape Vines do better on a trellis, as the training and pruning that suits them best is quite different from that employed for others. These may be planted 10 to 12 feet apart, along each side of a trellis which covers a broad walk. Rooted Vines may be planted at any time from June till September, pruned back to two or three eyes.

Spraying

The Winter Spraying of Deciduous Trees for the control of Scale, Red Spider and American Blight is one of the most important operations of the orchardist. It should never under any circumstances be neglected, and is essential to the success of the coming season's fruit crop.

FRUIT TREES

Everyone possessing a garden should make a point of including a few fruit trees. Economically they are a sound proposition, most fruits being useful either as dessert, for cooking or for preserving. Once established, the trees—given ordinary care and attention—continue to bear their fruit in season, year in and out. Health authorities speak in high terms of the value of fruit from a dietetic point of view, freshly-gathered fruit being particularly rich in essential vitamins.

Apples

(OUR APPLE TREES ARE WORKED ON NORTHERN SPY STOCKS.)

Price: 1/6 each; 16/- per dozen; £5/10/- per 100.

Postage or Carriage Extra.

(See Page 24.)

Apple Trees prefer compact, sandy loam, with shelter from west and south. Stiff, clinging land is not suitable, but any good average light soil will give good results. Young trees generally grow too fast, therefore strong growth should be checked by pinching back shoots in Summer, and by Winter pruning of roots.

EARLY VARIETIES

Allsopp's Early. The earliest Apple on Sydney market. Mainly useful for cooking.

Carrington. Fine apple. Blight-proof.

Gravenstein (Carpenter). Fruit large; rich yellow skin marked with red; flesh crisp.

Irish Peach. Blight-proof. Clear yellow skin striped red.

Lord Nelson. Showy; extra large cooking variety.

William's Favourite. Bright red; very fine flavour. One of the earliest.

MID-SEASON VARIETIES

Cox's Orange Pippin. One of the best. Greenish yellow skin marked red.

McIntosh's Red Good for both hot and cold climates; rich, red stripes; flesh white.

Mobbs' Royal. Extra large; good.

Pomme de Nieve (Fanny). A famous dessert apple.

Twenty Ounce. Green, yellow striped. Good cooking variety.

LATE VARIETIES

Black Ben Davis Seedling from "Ben Davis." A decided improvement. Solid red colour, better quality, good cropper.

Cleopatra. Large, crisp; a good dessert apple.

Delicious. One of the best late-keeping apples.

Democrat. Fruit brilliant red; good for shipping.

Five Crown Pippin (London Pippin). Valuable for all purposes.

Glengyle Red (Red Rome Beauty). Same type as parent fruit, but red all over.

Granny Mack. A cross between McIntosh's Red and Granny Smith. Strong trees, heavy bearer, and good keeper.

APPLES—(Continued)

Granny Smith. This well-known variety is easily the best apple for any district. Strongly recommended for export.

Jonathan. Does well in almost all soils and climates. Very tender and juicy.

King David. A rich dark red apple, with yellowish flesh; flavour good.

Lalla. Similar to Delicious.

Munro's Favourite. Large cooking variety; good keeper.

Northern Spy. Tender; delicious. First-class dessert variety. Blight-proof.

Rome Beauty. Fine shape, hardy. Skin greenish yellow, mottled and shaded red.

Apricots

(ON APRICOT AND PLUM STOCKS.)

Price: 1/6 each; 16/- per dozen; £5/10/- per 100.

Postage or Carriage Extra.

(See Page 24.)

Allen's Early. A second early variety, bearing large, conical shaped fruit. Good for marketing.

Blenheim. Large fruit, clear yellow skin with red markings; deep orange flesh.

Campbellfield's Seedling. Skin rich orange with large, red blotches; flesh deep orange.

Cattell's Early. Very early; good cropper.

Early Moorpark. Juicy, rich and excellent; ripens end November; rich orange skin and flesh.

Elrue. Clear, deep yellow skin with firm flesh. Ripens early December.

Glengarry Very early. Fruit not large, but a good cropper.

Hemskirk. Rich, like Moorpark.

Moorpark. Very large round fruit with deep reddish orange skin, very juicy. Ripens end December. Late. Good bearer.

Mansfield Seedling. Rich in flavour, similar to Moorpark; heavy bearer. Mid season.

Newcastle Early. Ripens middle to end of November. Fine yellow colour, and heavy bearer.

Oullin's Early Peach. Large; skin deep rich yellow; flesh orange; very rich. Ripens end December.

FRUIT TREES—(Continued)

Royal. Deep yellow, tinged red; flesh deep yellow; juicy. Ripens third week in December.

Tilton. Very large, rich, golden fruit; fine flavour, and an excellent canning and drying variety. Mid season.

Trevatt. Good cropper. One of the finest varieties for drying. Mid season.

Wenatchee. Large, golden-yellow. Ripens evenly. Fine shipper. Heavy bearer. Mid season.

Cherimoyer

CUSTARD APPLE.

Postage or Carriage Extra.
(See Page 24.)

A delicious tropical fruit; succeeds well in warm sheltered situations. Requires deep friable soil, with good drainage.

Rough Fruited. Seedlings from selected fruit, 2/6

Grafted Varieties commence bearing 4th to 6th year after planting. Available during August and September. Highly recommended. 7/6 each.

ANDERSON'S "EXCELLENTA"
PROMOTES HEALTHY
GROWTH

Cherries

1/9 each; 18/- per dozen; £6 per 100.

Postage or Carriage Extra.
(See Page 24.)

Cherries thrive exceedingly well in cooler districts.

Bedford Prolific. Large, handsome, black. A good market variety. Medium.

Bigarreau Napoleon. One of largest; heart-shaped. Skin amber, crimson markings.

Bigarreau Twyford. Bright red; flesh firm. Early cropper, and therefore recommended for market growing.

Bing. Fruit large, black; tree vigorous, with heavy, dark green foliage.

Black Republican. Solid flesh; juicy; late.

Black Tartarian. Skin glossy, purplish-black; flesh purplish. Largest size. Late.

Burgdorff Seedling. An excellent large, dark red early variety. Good variety for Coast.

Early Lyons. Deep red flesh; very juicy and a good early market variety.

Early Purple Guigne. Rich purple flesh; medium size; smooth skin; tender.

Early Rivers. Purplish black.

Florence. Large, richly flavoured red fruit with amber flesh. Very firm, and a good variety for late marketing.

Noble. Very large, dark red; flesh firm, good flavour. Late.

Ramen Oliver. Dark glossy-red; very large, measuring up to 1½-inch in diameter. Early.

St. Margaret's. Large, firm, sweet; skin black, purplish flesh. Good late marketing variety.

Werder's Early. Large, rich, black variety, suitable for market.

Figs

1/6 each; 16/- dozen.

Postage or Carriage Extra.
(See Page 24.)

These require no special treatment, and provided the soil is good and fairly moist, will produce the fruit. If the fig is grown near the house where it can be abundantly watered from the laundry, it will produce enormous crops of fruit, give a fine shade, and form a shelter. It requires but little pruning.

Adam. Large size fruit; pale brown; very early, and a good market sort.

Black Genoa. Large, juicy and rich.

Blue Ischia. Medium size fruit; skin dark purple; flesh deep red, sweet.

Blue Provence. Small, rich, abundant.

Brown Turkey. Luscious; good for drying.

White Adriatic. Large size; red flesh; rich.

White Genoa (Marseilles). Fruit above medium size, very rich, turning to amber colour when dried; skin white and tough; flesh red.

Guavas

1/9 each; 18/- dozen.

Postage or Carriage Extra.
(See Page 24.)

Of easy culture in districts where the climate is not colder than that of Sydney; preferring good and deep soil, but will grow and do well in any ordinary orchard ground.

Parker's Hybrid. Fruit creamy white; large.

Purple. Fruit deep purple.

Yellow. Large fruit; splendid for dessert.

Loquats

2/- each; 20/- dozen.

Postage or Carriage Extra.
(See Page 24.)

Californian Advance. Fruit large, deep yellow, being nearly all pulp. Flavour distinct and delicious.

Herd's Mammoth. Enormous. The best market variety.

FRUIT TREES—(Continued)

Medlars

1/6 each.

Postage or Carriage Extra.

Thrive well in New South Wales; require very trifling attention, and not particular as to soil.

Dutch. One of the best; medium size fruit.

Monstrous. The largest.

Royal. Highly esteemed for its flavour and productiveness.

Mulberries

Postage or Carriage Extra.

Black or English. Luscious fruit for any part of the State; very ornamental trees. 2/6 and 3/6.

Cape. Fast growing; useful for shelter; fruit small; culinary purposes only. 2/-.

Downings' Everbearing. Fruit long, juicy, rich; valuable for cooking only. 2/-.

Hicks' Everbearing. Rapid-growing shade tree; sweet sub-acid flavour. 2/-.

Nectarines

1/6 each; 16/- per dozen; £5/10/- per 100.

Postage or Carriage Extra.

(See Page 24.)

Any well and deeply-drained soil will suit Nectarines, but they cannot obtain perfection without abundance of moisture in Spring and Summer.

Albert Victor. Very large, delicious, yellowish white with a carmine blush. Ripens first week in January.

Cardinal. Very early; brilliant colour; prolific; freestone. Bright red.

Early Rivers. Large fruit; flesh tender, juicy. Freestone.

Elrue. Large fruit; skin greenish, dotted with red; rich, and very juicy.

Fertile de Poitou. Enormous fruit. Smooth skin with white flesh. Very juicy and sugary. Freestone.

Goldmine. Enormous fruit, juicy and melting. Excellent flavour. Mid season.

Irrewarra. Highly-coloured fruit with a splendid flavour. Freestone.

Lady Carrington. Thick, juicy flesh; skin, bright scarlet; ripe first and second weeks in January. Clingstone.

Lee's Seedling. Fruit large, richly flavoured. Early freestone.

Masterpiece. A large and most attractive nectarine. Skin, yellow, thickly overlaid with bright crimson; flesh, deep yellow, fine grained and juicy. Stone small. Ripens end of January.

Mrs. Dr. Chisholm. Beautiful cropper; ripens December. Early freestone.

New Boy. One of the best. Large fruit. Freestone.

Stanwick's Seedling (Camden Superb). Fine Freestone. Large, yellow, striped red.

NECTARINES—(Continued)

W. C. Fripp. Large yellow, with red and yellow markings. Flesh, juicy. Late Clingstone; good bearer.

Olives

Price: 2/6 each; 25/- per doz., plus freight.

The following varieties are the most noted, either for their oil-producing qualities, or as being especially suitable for pickling.

Black Italian. The best variety for pickling; large size and good flavour.

Bouquettier. Medium-size fruit, enormous bearer and produces a good yield of oil.

Boutillane. Introduced by the Dept. of Agriculture for oil-making, the yield being 11½ozs. to every 6lbs. of fruit.

Hardy's Mammoth. An olive of good size and quality. This variety has a pronounced shy-bearing tendency.

Lucca. From this variety the famous Lucca Oil is made. Enormous cropper, and gives a high percentage of oil.

Macrocarpa. A medium to large-sized olive of good quality. Produces good crops fairly regularly.

Nevadillo Blanco. A large-sized olive, of good quality, yielding a large percentage of good quality oil.

Verdale. An oil variety, producing a large quantity of good quality oil. One of the hardest.

Peaches

1/6 each; 16/- per dozen; £5/10/- per 100.

Postage or Carriage Extra.

(See Page 24.)

Sandy loam is the best, but any soil will produce good Peaches (if it is well drained), in nearly every district in N.S.W. As the young trees make very strong growth during the Summer, it is desirable to rough prune them while they are growing; all strong, superfluous shoots or branches should be cut right out, and all long shoots which remain should be shortened back, the object being to induce the production of spurs or small wood which will yield the fruit. The Trees should be carefully gone over in the Winter, and the pruning finished.

CLINGSTONE—Varieties marked (C).

FREESTONE—Varieties marked (F).

EXTRA EARLY VARIETIES

Ripening During November and December.

Admiral Dewey (F.). Early; yellow flesh.

Bell's November (F.). Ripe November; partial slipstone. Good variety for coastal areas.

Brigg's Red May (F.). Very best early peach.

Edward VII. (F.). Ripens early in November. Good for Coastal districts.

Flat China (F.). Early peach for market. Pale yellowish skin with pink markings.

Greenborough (F.). Large fruit, prolific. Suitable for short season districts.

High's Early Canada (F.). Very large. Early.

PEACHES—(Continued)

Le Vainqueur (F). Large and juicy. Very early. Skin, yellowish white. Good for canning.

Mayflower (F). All red; good shipper. Early.

Prince Henry (F.). Ripens the middle of October, which is three weeks earlier than the next earliest variety—Watt's Champion. This slipstone variety has an excellent coloured skin and white flesh; heavy cropper and good, strong grower.

Watt's Champion (F). A local production of great merit. It is a red freestone, ripening in favourable seasons before the end of October. It is the first peach of the season on the Sydney Market, and commands top prices. Is a strong grower, very prolific. A splendid market variety.

SECOND EARLY VARIETIES

RIPEN DECEMBER-JANUARY

Alton (F). Heavy cropper and carries well.

Braddock's (F). Flesh yellowish white, prolific; large. Suitable only for Coastal districts.

Carmen (F). White flesh, melting sweet.

Duffy's Christmas Box (F). Large cream-flushed red. White flesh; good flavour; ripening Christmas.

Hale's Early (F). High flavour; juicy; ripe Christmas.

Ruby Red Clingstone. Ripens early in January; heavy cropper. Flesh, white.

Wiggins (F). Fine peach; ripens Christmas.

Wootton's Shanghai (C). Improvement on Red Shanghai; larger and more highly coloured. Ripens Christmas.

MID-SEASON VARIETIES

RIPEN JANUARY-FEBRUARY

Aunt Becky (F). Large, early and prolific. Bright crimson skin and white flesh.

Blackburn Elberta (F). Ripens two weeks earlier than "Elberta." Good colour and in demand for market.

Early Crawford (F). Rich yellow, ripens middle January.

Early Elberta (F.). Fruit as large as Elberta, colour and quality good. Good cropper.

Elberta (F). Yellow fleshed; sweet; for dessert or canning.

J. H. Hale (F.). Half as big again as Elberta and a week earlier; a firmer and better colour.

Mountain Rose (F). Large, bright red, white flesh, good. Ripens January.

Row's Champion Slip (F). White flesh; very highly coloured. Ripens with Elberta.

Royal George (F). One of the best; large, round and even. Ripens January.

Royal George Cling (C). White, firm flesh. One of the best.

PEACHES—(Continued)

Shanghai Freestone (F). A valuable variety; exquisite flavour. Good for market. Ripens January.

LATE VARIETIES

Ripening February, March and April.

Golden Queen (C). Heavy cropper; medium size, yellow at stone; good canning.

Kirshler Prize (C). Similar to Royal George Cling; large size and excellent flavour. Ripens February.

Phillip Cling (C). An enormous yellow-fleshed cling, in demand by factories.

Pullar Cling. Fine for canning; very large and highly coloured; good grower and heavy cropper. Ripens early March.

Pears

(ON SEEDLING PEAR STOCKS.)

1/6 each; 16/- per dozen; £5/10/- per 100.

Postage or Carriage Extra.

(See Page 24.)

The climate, situation, soil, and cultural notes given for Apples will apply to Pears. Pears will not be in full bearing until the sixth year after planting, excepting such varieties as Bartlett, Keiffer's, and a few others, which frequently commences at second year after planting. To induce fruitfulness, we advise a judicious system of Summer pinching where practicable, followed, if necessary, by root pruning in Winter.

EARLY VARIETIES

Clapp's Favourite. Resembles "Bartlett." Early. Very large yellow, good market variety.

Jargonelle (English). Large, yellowish white flesh; good keeper.

Williams' Bon Chretien. "The Bartlett Pear," good for canning, marketing and home use.

MID-SEASON VARIETIES

Beurre Bosc. Large, dark yellow with markings of cinnamon brown; white flesh.

Beurre de Capiaumont. Melting and sweet. Ripe early Autumn.

China. Good early cooking variety.

Fertility. Large and excellent flavour. Good for market.

Howell. Medium, light, waxen-yellow, good quality; heavy bearer; good market variety.

Keiffer's Hybrid. Cross between Williams' Bon Chretien and China.

Packham's Triumph. A greatly improved Williams' Bon Chretien. Highly recommended for commercial or private use.

LATE VARIETIES

Bergamot (Bailey's). Medium size; good cropper.

Bergamot (Gansell's). Large, rich and melting.

Josephine d'Anjou. Pale green; flesh pink to white. One of the best export varieties.

PEARS—(Continued)

- Packham's Late.** Heavy cropper.
Winter Bartlett. A duplicate of the old favourite; ripening three months later.
Winter Cole. Very richly flavoured. Late.
Winter Nelis. Rich; skin yellowish green covered with russet markings.
Vicar of Winkfield. Large, long pyriform; pale yellow flesh.

Plums

(ON MYROBOLAN AND MARIANA STOCK.)

1/6 each; 16/- per dozen;
 £5/10/- per 100.

Postage or Carriage Extra.

(See Page 24.)

Plums thrive in our cool highlands. Any good soil will suit them so long as the subsoil is porous and well drained. We highly recommend the beautiful Japanese varieties for quality and appearance. Plums require to have their long shoots stopped during the growing season so as to produce spur wood.

EARLY AND MID-SEASON VARIETIES

- Angelina Burdett.** Large, purple; most excellent for dessert and preserving; medium.
Clyman. Dark purple; flesh yellowish; round; large; requires to be thinned.
Diamond. Large; best preserving. Ripening mid-season.
Early Orleans. Medium, large purple; juicy, sweet. Freestone.
Excelsior (Jenkins). Improved Angelina Burdett.
Evan's Early. Juicy, rich, excellent. An enormous cropper.
Greengage. Medium size; flavour delicious, very juicy and melting.
Tibbit's Seedling. Medium size, dark skin. Enormous crop.

LATE VARIETIES

- American Damson.** Clingstone; purple skin and greenish yellow flesh; juicy.
Coe's Golden Drop. Very large; excellent.
Grand Duke. Purple skin; yellow flesh.
Late Black Orleans. Medium size; skin black; blue bloom; flesh deep yellow; juicy clingstone.
Louthborough. Black; very prolific.
Magnum Bonum (White Egg). Very large oval fruit; skin and flesh deep yellow. Clingstone.
October Greengage. Twice as large as Greengage and earlier.
Pond's Seedling. Red; valuable.
President. Fruit is large, oblong-shaped, over 2in. long, beautiful purple colour; flesh firm and sweet.

Japanese Plums

(Same price as other Plums.)

(WORKED ON MARIANA AND MYROBOLAN PLUM AND APRICOT AND PEACH STOCKS.)

- Balleana.** Large early plum; skin light yellow with crimson markings; firm, pale yellow flesh; strong grower; freestone.
Beauty. Large round, dark flesh; long keeper. Ripens early December.
Burbank. Large, cherry red; flesh deep orange, juicy and sweet. Early.
Chalco. Deep reddish purple; yellow flesh. Large.
Climax. Early; fruit large; delicate flavour.
Cyca Smomo. Blood plum; earlier than Satsuma.
Doris. Bright red; juicy; fair size.
Early Gem. A very early variety; round fruit, medium size, amber flesh. Ripens early in November.
Early Jewel. Large; good cropper. Ripens late in November.
Kelsey. Valuable; one of the best. Large yellow. Late.
Narrabeen. Large, round; rather flattened; skin yellowish, covered dark red and yellow dots; flesh yellowish, juicy, very sugary, small stone; drooping habit but good grower; heavy cropper; good carrier. Ripens last week in January.
October Purple. Fruit round; distinct flavour. Medium.
Santa Rosa. Flesh deep purplish crimson, with purple skin. Commences to ripen early December. Medium.
Satsuma. Blood Plum; flesh dark red; heavy bearer. Late.
Shipper. Good cropper; hangs long time. Medium.
Shiro. Firm, yet juicy; light yellow; clingstone. Early.
Sultan. Firm, dark crimson, sub acid.
Wickson. Excellent; keeps and ripens well.
Wilson's. Ripens middle of November, almost black when ripe; flesh yellow; heavy bearer. Early.
Wright's Early. Fine early plum, similar to "Burbank."

Prunes

(Same Price as Plums.)

This list is specially recommended as giving the best varieties for drying.

- D'Agen.** Small, but unrivalled for drying.
Giant. The largest variety known; good for market.
Golden. Large, roundish oval; tough skin of a beautiful golden colour. Dries well.
Hungarian (Ponds). Yellowish skin marked with bright red. Large.
Robe de Sargent. Like Prune D'Agen, but large and better cropper.
Splendour. Large and sugary.
Sugar. Fruit even in size; large; rich in sugar, hence its name.

Persimmons

(DATE PLUMS.)

2/- each; 22/- dozen.

Postage or Carriage Extra.

(See Page 24.)

A Tomato-shaped fruit with a thin skin; flesh, when ripe, delightfully sweet and luscious. Will grow in nearly any part of our State; prefers a warm climate, but will not be injured by slight frosts.

Dai Dai Maru. Large, orange skin; yellowish flesh; nearly seedless.

Hyakume. Early, oblong, large.

Kurokuma. Early; highly flavoured.

Nitaro. Beautiful colour; flat, square-shaped fruit, similar to "Dai Dai Maru."

Tanenashi. Yellow, oblong, seedless.

Yemon. Flattened; yellow.

Quinces

1/6 each; 16/- dozen.

Postage or Carriage Extra.

(See Page 24.)

Most useful for preserves and culinary purposes generally; may be grown in poor soils, where ordinary fruits will fail; very hardy; makes a fine tree when fully grown.

Champion. Large and good. Late.

Giant of Lescovas. Large yellow. Flesh, white. Prolific variety. Mid season.

Large Portugal. Very large; good.

Master's Early. Earliest of all; large.

Meeche's Prolific. Large fruit; deep orange in colour. One of the best.

Missouri Mammoth. Pleasant flavour.

Rea's Mammoth. Large fruit; round. Early.

Van Dieman. Superior quality.

Zucker (Sugar). The sweetest of all quinces; very good when preserved.

Bananas

Postage or Carriage Extra.

(See Page 24.)

Cavendishii. Dwarf, delicious flavour; 2/6 each.

Gros Michael. One of the best market varieties. 2/- each.

Lady's Finger. Fruit, slender; fine flavour. 2/6 each.

Manilla. A universal favourite. 2/- each.

Sapientum. Common Banana; hardy. 2/- each.

Sugar. Small fruit produced in large bunches. Delicious flavour. 2/6 each.

Passion Fruit

Postage or Carriage Extra.

Passiflora Edulis. The well-known Passion Fruit. 9d. each; 7/6 per doz. (in 3in. pots). From open ground, 10/- per 100.

Special quotations for larger quantities.

Tacsonia Mollissima (Banana Passion Fruit), 1/6 each; 15/- doz.

Grape Vines

(ON THEIR OWN ROOTS.)

1/- each; 11/- per dozen. Postage extra.

*Marked thus, available on Phylloxera Resistant stocks. 1/9 each, 18/- doz., £5/10/- per 100.

All grown outside phylloxera-infested areas, and can be sent anywhere in the State.

GRAPE VINES—(Continued)

***Black Muscat.** Medium size, oval berries, with rich Muscat flavour.

***Black Hambro.** A well known variety, the best for coastal districts as well as inland.

Black Sherry. A fine, black grape, most valuable for its lateness, coming in as late as "Camden Sherry."

Black Shiraz. Berries medium, compact bunches; carries well.

Black Malaga. Bunches large and tapering; berries very large, oval; skin, deep black, very thick; a valuable grape on account of its lateness; a splendid carrier.

Black Prince. A noble-looking grape; bunches, long; berries largest size, oval, rather thinly set; skin, thick, deep black, very rich and sugary; late.

Buckland's Sweetheart. Very early white, prolific bearer.

***Black Lady's Finger** (Purple Cornichon).

Same shape and flavour as Lady's Finger, but skin a deep, shining black; more hardy; not susceptible to black spot.

Black Sultana. Bunches, medium size, long; berries, medium size, oval; skin, black; flesh without seeds. A very fine table grape.

Doradillo (Known also largely as Camden Sherry and Baxter's Sherry). Grown largely in South Australia for the Sydney market, where it arrives towards the end of March in grand condition. Berry, very large, rich amber.

Early Sherry. A profitable, early, white grape, largely grown for market.

Flame Tokay. A very late ripening variety; bunches rather loosely set, which is a decided advantage for a late grape.

Golden Chasselas. Amber, handsome grape in cultivation, light colour, packs and carries well.

***Gordo Blanco.** This is very extensively grown for raisins, being for that purpose superior to the well known "Muscat of Alexandria." Good table grape, and the best white muscat on the market.

Gros Colman. A splendid late black grape, very large berries; requires warm situation.

Isabella. A well known variety; berries, large, black; a very strong grower.

Lady's Finger. Pinkish white, berries long, very attractive shape; requires dry climate and loamy soil.

***Mrs. Prince's Black Muscat.** Late; berries, largest size, deep, shining black; skin, thin, very tough.

***Muscat of Alexandria.** Berries very large, amber colour, splendid flavour; one of the finest grapes.

***Muscat Hambro** (Snow's). Berries and bunches large, black, superior flavour, and abundant bearer. The finest of all black muscats.

***Red Muscat.** Medium sized fruit, early; rich Muscat flavour.

Sultana. Bunches, medium size, long; berries medium size, oval; skin, pale yellow; flesh without seeds. A very fine table grape, but chiefly valuable for raisin making.

Sweetwater. Early; bunch and berry large, pale amber; very heavy cropper.

GRAPE VINES—(Continued)

White Sherry. A well known variety, great cropper and good for market.

***White Muscat.** Berries large, mid season; strong Muscat flavour.

***Waltham Cross.** Bunches very large; berries, very large, round; skin, thin but tough, of a clear, pale amber. A magnificent grape; especially suited to the warmer districts. Makes a good raisin. Late.

White Isabella. A well known variety, berries large, medium growth.

Zante Currant. The grape for making the currant of commerce.

NOTE: We have now made such arrangements as will enable us to send Grape Vines to any part of the State.

Queensland customers please note it is against the regulations of that State for Grape Vines to be sent there from New South Wales.

Miscellaneous Fruits

Postage extra.

Hovenia Dulcis (Chinese Raisin).

Flavour resembles Muscatel Raisin.

It forms a handsome small tree; s. d.
delicious 2 6

Mango 3 6

Papaw 2 6

Pineapple 2 0

Pomegranate (*Punica Granatum*) . . 1 6

NUTS

The majority of nut bearing trees make attractive specimens; profitable crops can be grown where the soil and climate are suitable. It is advisable to plant two or more of a sort to provide cross-pollination.

Almonds

1/6 each. 16/- per dozen.

Postage or Carriage Extra.

It is not advisable to plant Almonds in districts where severe frosts occur in the late Spring, as the frosts would be likely to injure the flowers and prove fatal to the crop. They thrive and produce the best crops on a variety of soils, provided they have been well drained. A light, sandy loam will suit them best. Almonds are a profitable crop to grow, and are well worth the orchardist's consideration.

The successful pollination of almond blossom results in profitable crops, and the following table should be followed when selecting varieties:—

Varieties marked "A" will pollinate each other.

" " "B" will pollinate each other.

" " "C" will pollinate each other.

Those varieties "BC" such as Hatch's Nonpareil will pollinate with varieties in Class "B" or "C."

Brande's Jordan (A). Large; good bearer.

Burbank's Seedling (C). Hardy and heavy cropper.

Eureka (C). Heavy cropper; paper shell.

Golden State (C). Heavy and regular bearer with smooth kernel.

I.X.L. (B). Nuts, large; soft shell.

Hatch's Nonpareil (BC). A very fine almond; large kernel and very thin shell.

Large Paper Shell (AB). The common variety.

White Nonpareil (C). Strong grower; heavy cropper; nuts very large.

Chestnut

Postage or Carriage Extra.

(See Page 24.)

Japanese. Produces good nuts when only 4 years old. 2/6.

Spanish (*Castanea Vesca*). A fine, stately tree, magnificent foliage; fruits freely; succeeds admirably in our cooler districts. 3/- each. 33/- dozen.

Filbert

(Hazel Nut)

1/9 each; 18/- dozen.

Postage or Carriage Extra.

(See Page 24.)

Thrive well on the mountains between the coast and the Riverina. They will grow well, but produce little fruit in the immediate neighbourhood of our coast. At Braidwood, and even at Picton, Berrima, Hartley, Mudgee and Bathurst, they bear well.

Northampton Prolific.

Red Skin. Excellent flavour.

White Skin. Similar to above.

Macadamia

(Queensland Nut)

2/- each; 22/- dozen.

Postage or Carriage Extra.

(See Page 24.)

Magnificent evergreen tree, a handsome subject even without the crops of round sweet nuts produced in greatest abundance when once the trees become established (7-8 years). Would make a most profitable special line for orchardists and home gardeners, as the nuts sell very rapidly. Likes a warm climate and some little protection for the first couple of years. Both varieties are worthy of cultivation.

Integrifolia.—Smooth leaved variety. Nuts, medium thick shell. Heavy cropper.

Ternifolia. Thinner shell than *Integrifolia*; good bearer, round nut.

Pecan

(*Carya Olivaformis*)

Postage or Carriage Extra.

(See Page 24.)

A most delicious nut which comes into bearing in 8 years. Requires a deep, loamy soil, also an ample supply of water; fine shade tree. Deciduous.

Grafted Plants—

We have a number of varieties available. These we recommend, as they produce larger nuts. 7/6 each.

Seedlings. From selected nuts. 2/6 and 3/6.

Walnuts

2/6 each; 27/- dozen.

Postage or Carriage Extra.

(See Page 24.)

These delicious nuts can be produced in any climate suitable for the Spanish Chestnut, and even in colder districts.

Chaberte. Large kernels. Very fine flavour.

Juglans Cordiformis. A flat variety; heavy bearing.

Juglans Regia (English or Persian). A fine, handsome tree; good cropper.

Juglans Sieboldii (Japanese).—Nuts borne in clusters; very hardy.

BERRIES

Blackberries

Postage or Carriage extra.

The bushes form an admirable thick, prickly hedge, and its fruit is most useful as dessert or for preserves. Quick growing; not particular to soil or climate.

Dewberry (Lucretia). One of the very best of this attractive class of fruit berries; large and handsome, and shining jet black; of delicious quality. Price, 9d. each; 7/6 dozen.

Himalayan. Beautiful, fine foliage. 2/- each.

Laughton. Large, excellent flavour. 9d. each; 7/6 dozen.

White Crystal. Clear golden yellow form of Blackberry. 1/- each.

Currants

1/- each; 10/- per dozen.

Postage or Carriage extra.

We can supply all the best varieties in Blacks, Reds, and Whites.

Gooseberries

1/- each; 10/- dozen.

Special Quotes 100 and 1,000 lots.

Postage or Carriage extra.

We can supply a large quantity of this useful cold climate fruit in red, yellow and green varieties. In the leading commercial varieties, such as Crown Bob and Roaring Lion.

CITRUS FRUITS

We can recommend to our customers with every confidence our first quality Citrus Trees. They are not only sturdy plants, but have been grown from buds selected from trees of good type and of good bearing habits.

Owing to existing regulations some kinds of Citrus cannot be sent to Queensland. These varieties are marked with an asterisk (*).

SPECIAL QUOTES FOR LARGE QUANTITIES.

Oranges

2/- each; 22/- per doz.

Postage or Carriage Extra.

(See Page 24.)

Blood (Maltese). Medium size, flesh blood colour.

Buckeye Navel. A true Navel Orange, ripening early; distinct; delicious.

Golden Nugget Navel. Fruit smooth, solid, thin-skinned; colour strong gold. Even cropper. Early.

Groverley Navel. Large yellow, not quite seedless. Crops well. The best mid season navel for poor soils.

***Jaffa.** Excellent, and a constant bearer.

***Joppa.** Large; thin skin; juicy pulp; seedless. Mid season.

Mediterranean Sweet. An excellent Orange.

Paterson River. A fine Orange of Parramatta type; tree strong grower; heavy fruit; good bearer.

Loganberries

1/- each; 10/- dozen.

Postage Extra.

Fruit like large Blackberry, produced in clusters; dark red colour. A highly desirable fruit for jams or preserves.

Raspberries

6d. each; 5/- per doz.; 35/- per 100.

Postage or Carriage extra.

A really useful fruit, and of easy culture in the colder districts of the State.

Antwerp Red. Large, fine flavour.

Cuthbert. Sturdy grower; red.

Northumberland Fillbasket (Thornless).

Deep red; good size and flavour.

Victoria. Large, red; excellent. Late.

Youngberry

These luscious berries are sure of a great welcome in Australia, being suitable for all districts and just as easily grown as the popular Loganberry.

The berries are always large and extremely firm. They are deep wine colour, changing to jet black as they age, and the exquisite flavour suggests a combination of Raspberry, Blackberry and Dewberry, with a piquancy which gives just the right zest to their superior sweetness. The vines are heavy producers, and are extremely vigorous.

The seeds are so few and so soft that the berries may be considered as practically seedless, and even the cores are tender. They are excellent for jam and jelly.

Plant them six to seven feet apart on wire trellises or fences, choosing a sunny, well-drained position.

Plants, strong and well-rooted, 1/6 each;

Postage Extra.

LARGE QUANTITIES.

ORANGES—(Continued)

Parramatta or Queen. Large, hardy, prolific. Mid season.

Poor Man's Orange. Very large, hardy Orange, slightly bitter; makes best marmalade.

Seville. Bitter; for preserving.

St. Michael. Large, thin skin; best for export. Good for market.

Navelencia. A cross between Valencia and Washington Navel. Retains the good qualities of Washington, together with hardness of Valencia. Ripens earlier than Washington.

Thompson's Improved Navel. Improvement on Washington Navel; fruit equal to that variety but is earlier. Consistent bearer.

Valencia. Late Orange, but most excellent.

Washington Navel. Large yellow, juicy and good flavour. Early. Prolific; better than old Navel in size and flavour; hardy.

***White Siletta.** Earliest, skin fine, thin, juicy.

CITRUS FRUITS—(Continued)

Mandarins

2/- each; 22/- per dozen.

Postage or Carriage Extra.
(See Page 24.)

- ***Beauty of Glen Retreat.** Excellent; enormous-cropper. Mid season.
- Cumquat.** Small; for preserving.
- Ellendale Beauty.** Improved Beauty of Glen Retreat; is not liable to split in wet weather. Late; hangs well.
- ***Emperor.** Large, beautiful fruit; one of the best. Mid season.
- Fewtrell's Early Shipping.** Practically the largest Mandarin in cultivation. Fruit ripens very early and is a good carrier.
- Imperial.** Earliest variety in cultivation.
- Jacob's Improved Thorny.** Large and early.
- Late Emperor.** Late variety, fair size, somewhat like Emperor; can be marketed till January.
- Onshi** (Japanese). Said to withstand frost; pendulous habit, no seeds, flesh firm, thin skin. Very early.
- Parker's Special.** Large fruit, loose skin, excellent quality, ripens early.
- ***Scarlet** (Syn. Canton). Large fruit, skin almost scarlet; flesh juicy.
- Thorny.** Small, firm, fine high flavour. Mid season.

Lemons

2/- each; 22/- dozen.

Postage or Carriage Extra.
(See Page 24.)

- Common.** Well known; rough-skinned.
- Eureka.** See Sweet Rind.
- ***Lisbon.** One of the best; bears over a long period; large, juicy fruit, thin skin; good keeper.
- Lisbon Variegated.** Vigorous grower and bearer.
- Sweet Rind.** Medium size and very even. Sells very freely in the markets. Early; bears well in summer.
- ***Villa Franca.** Oblong, thin skin, superior flavoured. Vigorous grower.

Limes

2/- each; 22/- dozen.

Postage or Carriage Extra.
(See Page 24.)

- East Indian.** Large, very juicy.
- Persian or Sweet.** Large roundish, yellow; particularly sweet; heavy cropper.
- Tahitian.** Fruit very large.
- West Indian.** Best for lime-juice. Nearly seedless.

Citrons

2/- each; 22/- dozen.

Postage or Carriage Extra.
(See Page 24.)

BENGAL. KNIGHTS.

All varieties of Citrons are very similar. They are largely used for making candied peel, also marmalade of strong Citron flavour.

Grapefruit

POMELOES.

2/- each; 22/- dozen.

Postage or Carriage Extra.
(See Page 24.)

- ***Marsh Seedless.** Medium size, thin rind, half the usual bitterness; practically seedless; pulp juicy; very little rag; superior flavour; keeps and packs well. Mid season.
- Thompson.** Said to be a sport from Marsh Seedless and recommended by the Dept. of Agriculture, N.S.W. The fruit is rounder and larger than Marsh Seedless; flesh pinkish. Well worthy of a trial. Price, 2/6 each.
- Triumph.** Medium size, smooth, clear skin and fine grain. Heavy cropper. Juicy and without bitterness.

Shaddocks

2/- each; 22/- dozen.

Postage or Carriage Extra.
(See Page 24.)

- Blood.** Excellent for preserving.
- Manilla.** Small, sweet juice.

Freight on Fruit Trees and Roses

Carriage or postage is extra on all Fruit Trees and Roses. It is a difficult matter to tabulate the costs for all quantities and towns, but the following will be a guide:—

- 12 Fruit Trees weigh about 12 to 18 lbs. packed.
- 50 Fruit Trees weigh about 56 lbs. packed.
- 6 Standard Roses weigh about 12 to 18 lbs. packed.
- 12 Standard Roses weigh about 28 to 30 lbs. packed.
- 6 Bush Roses weigh about 4 lbs. packed.
- 12 Bush Roses weigh about 8 to 10 lbs. packed.
- 50 Bush Roses weigh about 56 lbs. packed.

Lots weighing, say, 14 lbs., are best sent per passenger train, freight prepaid, and for this scale please see **Page 24.**

Over 14 lbs. parcels are better sent per single package goods (a specially cheap rate applying to goods up to 140 lbs.). In this case freight may be paid at destination except in the case of unattended platforms.

Smaller parcels are better sent by parcels post. For these rates see **Page 24.**

We forward parcels promptly, and advise despatch. Any difference in charges will be adjusted.

STRAWBERRIES

Postage on all Strawberry Plants, 9d. per doz.; 2/- per 100 extra.

Special Quotations for Larger Quantities.

CRESWELL'S SEEDLING—Good for warm districts; large long fruit of a bright, glossy red colour; early; will crop right up to May. 9d. doz., 5/- 100.

DOUGLAS SPECIAL—A strong growing, heavy cropping variety that is ideal for both private and commercial growers. The fruits are large, luscious, and of excellent flavour and texture; ripening to a rich red colour all over. Fruit carries well. 1/- doz; 7/- 100.

ETTERSBURGH, No. 89—Fruit large, very firm, and a good carrier. 9d. doz., 5/- 100.

FENDELICINO IMPROVED—A vigorous growing variety, bearing fruit of a very bright scarlet colour. It is a splendid variety for market, as well as the home garden. Produces large crops well into the summer. Strong plants. 1/- doz., 7/- 100.

KING EDWARD VII.—Berries extra large, produced in bunches; heavy and constant cropper; bears from September to May. 9d. doz., 5/- 100.

MASON'S IMMENSE—One of the largest Strawberries ever put on the market. Berries of fine flavour and bright red colour. Crops very freely. Plants vigorous and quite hardy in all soils. This variety is self-pollenating. 1/- doz., 7/- per 100.

RHODES SPECIAL—Especially good for Spring and Autumn crops, and in the coastal districts bears even during the Winter months. The fruit is light red in colour, of good shape, and produced freely. The flavour is excellent. Plants of this variety, 9d. doz., 5/- 100.

WARRAWEE—A heavy and continuous cropper, and the berries are of extra large size. The colour is brilliant deep scarlet and the flavour is superb. **Bears all the year round** in frost-free places. 1/- doz., 7/- 100.

Strawberries are delectable dessert fruits, easy to grow, and suited for almost every climate. We offer well rooted plants of specially chosen varieties.

CARRIAGE ON FRUIT TREES AND ROSES

POSTAGE on all Roses (except Standards) will be:

	In N.S.W.	Interstate.
On 1 Rose - - - - -	9d.	1/-
2, 3 or 4 Roses for - - - - -	1/-	1/6
5 or 6 for - - - - -	1/3	2/-
7 to 12 - - - - -	1/9	3/-

STANDARD ROSES must be sent by rail, the freight being charged extra.

FRUIT TREES will be sent by the cheaper method, but as a rule it is best to forward by rail. In the case of large orders, goods train is the cheaper, and freight may be paid at destination. We forward parcels promptly, and advise despatch. Any difference in charges will be adjusted.

A Garden Worthy of Your Home

Just as a priceless gem needs the correct setting to display its loveliness and beauty, so a new home requires a garden designed on the right lines to accentuate its architectural features and portray to the fullest extent the charm of the structure.

Too many modern homes are practically spoiled because of inartistic treatment of the garden and grounds.

It is an amazing fact that many people spend huge sums of money on erecting a luxurious dwelling, then ruin the whole effect by curtailing reasonable expenditure on the garden.

They really destroy the lustre of the gem, through lack of correct setting.

Some types of dwelling are best suited by gardens of formal type, with clipped shrubs and hedges, standard roses, stone paving, and other features that conform to the exactness of certain architectural ideals.

Other homes are designed on lines that demand Oriental treatment—others again lend themselves to stone flagged courtyards and piazzas, adorned by suitably chosen tubs with correct specimen plants therein; and, perhaps, in some suitable cases, spurting fountains and pools—bird baths—grottos of cacti—agaves—yuccas—and other succulents that serve to maintain the correct atmosphere and setting for the architecture of the home itself.

The closest collaboration should be held between the Architects of the dwelling and the Landscape Gardeners entrusted with the beautification of the garden and grounds, to assure that perfect harmony in every detail, that is so necessary in order to give entire satisfaction to people of taste and refinement.

Anderson's employ gardeners of artistic temperament, who are able to create unique and wondrously beautiful effects, by putting to best purpose any natural advantages found on the allotment, and by skilfully camouflaging any disadvantages that exist. These artistic craftsmen know just how to proceed to assure the right perspective, and to prepare the ground for the well-being of the plants, shrubs and trees in their future life.

They are skilled also in grouping the correct shrubs, trees and palms, to create and maintain the interests and admiration of all who have the "seeing eye and the understanding mind."

Our Firm has also provided advanced specimens of all the most desirable varieties for any given position or purpose, so that every modern home—no matter what period or form of architecture—can be adorned in suitable manner; and, better still, they can be so adorned without years of tedious waiting, because these advanced plants are growing in tubs, boxes, or tins, and are of sufficient size, when planted, to give gardens and grounds an appearance of permanence immediately; yet they still further enhance the beauty of the holding as they grow in grace and stature.

They transplant with absolute safety, on account of having been grown in suitable containers.

Palms, Cedars, Junipers, Retinosporas, Cypressess, Maples and Poplars are but a few of the trees available in advanced form; whilst the names of shrubs are legion—from Azaleas and Rhododendrons for cool, shady positions, to Cacti and all manner of succulents for hot, dry corners, where little else would thrive.

Amongst the palms available in advanced stages, are Phoenix Canariensis and others suited for large specimen plants and avenues; to the aristocratic Phoenix Roebellini that puts the "hall mark of distinction" on any home where it is used for indoor or outdoor decoration.

Call, telephone, or write for full particulars.

ROSES AND FRUIT TREES

Climbing Roses

Our stocks of climbers include the very best and most colourful of Singles, Semi-Doubles and Doubles. If in doubt, leave selection to us; but mention the class or classes you prefer.
